If you appreciate beauty and demand brains.

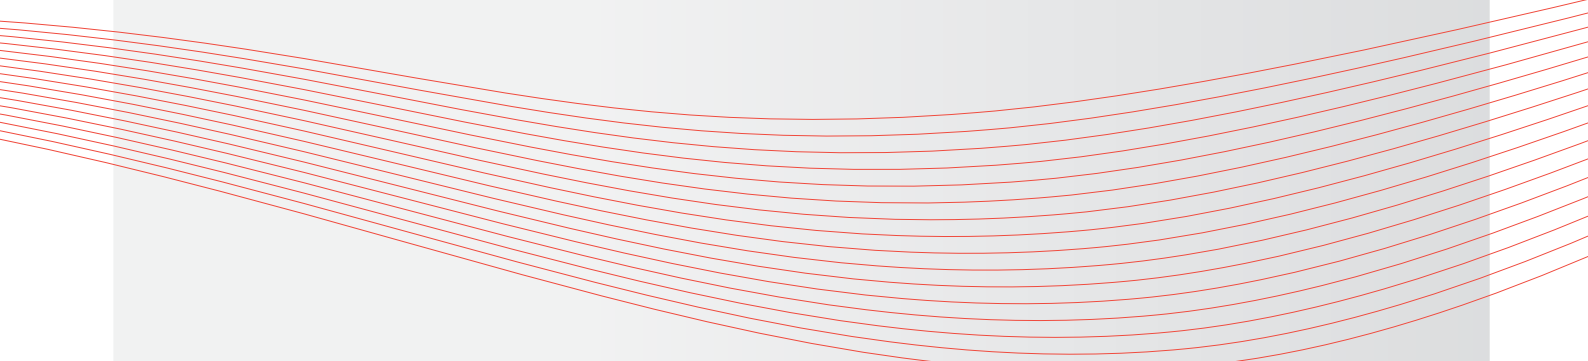

You appreciate healthy, comfortable living – and look for products that support your lifestyle.

You create your home with a defined style: you prefer timeless furnishings which harmonise with the ambience.

You search for smart solutions which combine innovation, quality, durability and energy efficiency and which do not unnecessarily encroach on your living space.

You have an uncompromising approach when it comes to heating your home and prefer individual temperature control in each room.

If this is you, then the Zehnder Fare Tech electric radiator is just what you're looking for:

- Optimal shape for fast, comfortable warmth
 - Unique, timeless look
 - Harmonious integration in your home's ambience
 - Individual temperature control in each room
 - Energy-efficient operation, displayed clearly
 - Suitable for both new builds and renovations
- 
- A decorative graphic at the bottom of the page consisting of multiple thin, parallel, wavy lines in a reddish-pink color, curving across the width of the page.

Optimal shape for optimal efficiency.

The Zehnder Fare Tech electric radiator combines beauty and brains. It stands out with its unique appearance based on the elegantly curved front panel. Its distinct shape also offers functional advantages: it allows the comfortable radiant heat to disperse optimally throughout the room. The unit's smart control panel of the intelligent controller is seamlessly integrated into the design: the easily legible LCD display indicates the temperature as well as energy consumption. Well thought-out functionality which creates a healthy and comfortable indoor climate while at the same time saving energy and costs.

Convenient control: The electronic control panel integrated in the design allows temperatures to be set precisely in each room.

Perfect integration: Available in many sizes and in the colours of the Zehnder colour chart.

Unique appearance: The elegantly curved shape ensures optimal radiant heat distribution.

Efficient operation: Three heating programs and an energy consumption indicator ensure operation as needed.

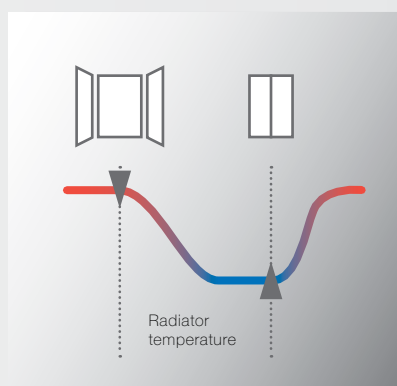

Fast, comfortable warmth: Thanks to the radiator's curved body made of heat-conducting, corrosion-resistant aluminium.

Simple to install: The H bracket painted the same colour as the radiator, makes installation easier with an integral spirit level.

Easy to install, even easier to operate.

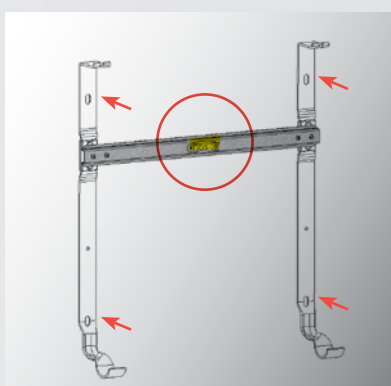

Thanks to the materials and design used in its manufacture, the Zehnder Fare Tech can be handled and installed by one person, regardless of model size. And operation is even simpler: any room can be brought to the desired temperature easily by using the control panel of the decorative radiator. In addition, three predefined heating programs can be selected. The Zehnder Fare Tech scores highly on energy efficiency. Its open window detection feature automatically switches the radiator off – and once the window is closed it returns to normal operation.

Open window detection

The integral control unit recognises if a window has been opened for an extended period and switches the radiator off. Once the window is closed, the radiator returns to normal operation.

- External temperature sensor recognises temperature changes
- Integral thermostat reacts to sensor information
- Radiator automatically switches off if a window is open for an extended period.
- Intelligent heating that saves energy and costs

H bracket

Practical installation: The H bracket with integral spirit level makes it easy to mount the radiator level on the wall.

- Integral spirit level guarantees precise, level installation
- Designed for practical installation
- Perfect appearance: Radiator mounts close to the wall, H bracket is painted the same colour as the radiator

Smart handling

The control panel is designed as an integral part of the radiator: it is simple to operate using plus and minus keys and temperature and energy consumption are easy to read.

- Three predefined heating programs
- Control panel can be locked for security
- Operation as needed with energy consumption indicator

H = Height in mm / L = Length in mm
P = Heat output in watts / M = Weight in kg
