

Say yes to
WATER SMART LIVING

Kitchen brochure

Sustainable use of water can help us achieve positive long-term changes. But how will we get there? By taking more conscious decisions about our consumption habits – through cutting-edge solutions which may help us use water in a more intelligent, safe and comfortable way.

At HANSA, we have been working for decades on faucets of the highest quality aimed at raising awareness regarding water use and conservation. With craftsmanship, technology and design. For a more intelligent lifestyle.

If we say yes to Water Smart Living, we say yes to a healthier and safer future allowing us at the same time to reduce our levels of water and energy consumption. No matter whether we are in the kitchen, at home or in a hospital, in a school or in the public space. Since we are saying yes to a lifestyle in which intelligent faucets can lead us to a conscious use of water. And this not only for our own convenience but also for our environment, safety and health.

More than just a beautiful faucet

We have made it our mission to create the most intelligent water experience for all of us. With products which are not just beautiful to look at but are also safer for you, your loved ones and the environment. Quality, performance and convenience based on smart technology and useful design.

Intelligent technology

Improve hygiene and safety, for example by choosing a SMART faucet, and save water and energy in the process. Thanks to Bluetooth® technology our products utilise state-of-the-art connection technology and enable you to monitor and control your levels of consumption.

Sustainable solutions

Our products join intelligence and style by their elegant design and water-saving features. But that's not all: Our products are made of the best high-quality materials and are also incredibly durable.

Health and safety

To ensure water always remains pure and clean, we only work with high-grade, durable materials such as dezincification and corrosion-resistant brass or modern composites. Touchless products minimise the spread of germs and bacteria and ensure convenient and comfortable operation, especially when your hands are dirty.

Useful design

Our kitchen fittings are designed for simple installation, maintenance and intensive daily use. We have created a range of products that meets your diverse needs, making daily kitchen life as enjoyable as it is enriching, while always emphasising your personal style.

Award winning sustainability

A bronze medal from EcoVadis, recognised as one of the world's most trusted providers of business sustainability ratings, underlines the responsible actions that we as a company take.

Responsibility begins with the choice of materials

Our fittings are manufactured exclusively from high-grade, durable and hygienically safe materials. For instance, we use dezincification and corrosion-resistant brass or modern composites for all our faucets. This helps to prevent the release of metals or other harmful substances. Strict material parameters and voluntary quality inspections by independent institutes, such as the German Technical and Scientific Association for Gas and Water (DVGW), certify our quality assurance.

The result is sustainable and excellent drinking water quality throughout the faucet's entire life cycle.

Our contribution to pure water

Whether for the first coffee of the day, your baby's bottle, cooking or so many other things: everything in the kitchen revolves around quality, health and safety. Water quality is, therefore, subject to strict and intensive scrutiny. And the last few metres are also crucial. The high-grade materials of our faucets ensure excellent drinking water quality is maintained right up to the point of consumption.

The highest level of water purity

This is a promise that we honour with the exclusive **HANSAPROTEC SYSTEM**. Many of our faucets also convince with nickel-free waterways and a promise that surfaces in contact with drinking water contain less than 0.3% lead. Combined with our dezincification-resistant brass, they deliver exceptional impetus in terms of health and sustainability.

All our faucets with the **HANSAPROTEC SYSTEM** can be found on **pages 24, 26, 32, 34 and 36**.

*We are a specialist
trade **partner****

In good hands from the start – also in your kitchen

Focusing firmly on the customer

The customer is at the heart of everything we do at HANSA. This has been our mission from the start. For over 100 years, quality, reliability, service and customer-oriented solutions have been the primary focus of our activities. Based on our many years of experience, we have become the specialist in the development of faucets for a wide range of applications. Ultimately, our business is not just about faucets, it is also about not only meeting but exceeding your expectations.

A specialist trade partner

Since working with water in homes is challenging and involves a high degree of responsibility, we believe that only professional tradespeople should be involved in the planning, installation and maintenance of all our faucets. This is why our fittings are available exclusively from professional sanitary supply partners – along with all the relevant competent advice and dependable customer care that you have come to expect. This guarantees that you not only acquire a top quality solution but also a sense of all-round well-being. Irrespective of whether you are planning a new kitchen or giving your old one a makeover with HANSA technology.

* Readers of "markt intern", the business information service for German plumbing specialists, have voted HANSA the No. 1 specialist trade partner a total of 21 times as part of the "performance report for sanitary fittings" that is awarded every two years.

Choosing the right faucets

From design and placement to functions, there are so many things you need to consider when choosing your favourite kitchen faucet.

Our tips help you find the ideal faucet to meet your needs

Be practical

Before purchasing a product, consider a few practical details. Will the faucet be installed on a worktop, in front of a window or in the middle of the room on a kitchen island? Do you want to optimise the space in and around the sink, do you value versatile functions or are you looking to make a statement? Make a list of the things your faucet must offer to meet the needs of your everyday lifestyle from a quick breakfast through to the technical finesse of a professional kitchen.

Durable and stylish

Let's be honest: The first thing we all look at is the design. Our faucets are therefore designed with practicality and durability in mind without sacrificing on style. You can rest assured that the faucet in your kitchen will retain a youthful shine and perform flawlessly even after many years of use.

Think ahead

Digitalisation and networking also ensure simple and transparent processes in the kitchen. Touchless faucets, in particular, provide valuable help and support thanks to their assistance function. With clean surfaces and extremely efficient water and energy consumption, digital kitchen faucets set completely new standards.

Invest in safety

Keep you and your loved ones safe. Ideally with functions that prevent scalding and materials that help maintain the highest quality of the drinking water throughout the faucet's entire life cycle.

Our ingredients for the best faucets: quality and performance

Choose the ideal equipment to meet your needs

Ready for more safety and hygiene

The display shows the water temperature in real time and warns when the water gets too hot.

Touchless hygiene: for cleanliness and safety in the kitchen. The spread of bacteria and germs is reduced significantly.

Appliance shut-off valves can effectively prevent water damage.

Convenience and performance are key to success

Washing vegetables gently, rinsing dishes thoroughly: enjoy greater flexibility and reach with our hand sprays.

Flexible spouts add a touch of elegance and give your kitchen a professional look and feel.

High spouts and deep sinks create extra space for large vessels.

Long-term sustainability and safety

Water only flows when you need it. Targeted water consumption through touchless faucets allows you to also save energy and water in your kitchen.

We use a high-grade brass alloy to ensure outstanding drinking water quality throughout the faucet's entire life cycle.

HANSAPROTEC: For additional protection of the water quality through minimised lead content and nickel-free waterways.

Choose your style

Good design is everything. HANSA offers a wide range of various shapes and styles to ensure your chosen faucet fits seamlessly into your dream kitchen. The basic shape of the spout plays a crucial role here.

Elegant minimalism
Curved swivel spout with side control.

Modern minimalism
L-shaped swivel spout with straight head section and side control.

Modern functionalism
L-shaped swivel spout with angled head section and side control.

Classic functionalism
Low-set, upright spout, a cylindrical body and top control.

Traditionally mounted
Wall connections and a central swivel spout.

All our kitchen fittings are equipped with a swivel spout, and quite often even with a selectable swivel range.

The SMART way into a better future

*Reduce bacteria **by
up to 80%** with
touchless faucets**

*Mäkinen R., Miettinen I. T., Pitkänen T., Kusnetsov J., Pursiainen A., Kovanen S., Riihinen K., Keinänen-Toivola M. M. (2013) Manual faucets induce more biofilms than electronic faucets. Canadian Journal of Microbiology, 59(6), 407-412. DOI: 10.1139/cjm-2013-0131

Designed for your convenience and ease of use

We were one of the first manufacturers to launch touchless faucets and our growing SMART range provides us with the knowledge to develop such ingenious faucets that make life so much easier. Faucets that prioritise safety, hygiene and sustainability and can be individualised and controlled via Bluetooth®. Who says you can't have it all?

Hygienic and safe for the whole family

Irrespective of whether you live with young children or older relatives, our SMART faucets are designed for every generation. Besides reducing the spread of bacteria by up to 80% compared to conventional faucets, our SMART faucets minimise the risk of scalding and are ideal for every budget.

Environmentally friendly from start to finish

Everyone can save water – and the right faucet plays a key role. Our SMART and touchless faucets only allow water to flow when hand movement is detected. They help to reduce your water consumption by up to 50%. But that's not all. Our faucets also save energy. Delivering sustainability without compromising on convenience.

The HANSA Matt Black Edition

Give your kitchen
a designer look

A colour that exudes elegance and a classic, timeless style

Kitchens have become a dynamic area within our living space and matt black faucets open up a whole host of design options. Matt black faucets are all the rage right now, also in kitchens. A true visual highlight for every occasion. Whether for your daily kitchen needs, a family dinner or a get together with friends: they create an elegant addition to your home.

Coatings with a velvety smooth finish

At HANSA, we take our obligation as a top quality brand very seriously. This is why our matt black is more than just a colour. It is a noticeably voluminous, durable and scratch-proof coating connected with the substrate on the molecular level. Giving you the enjoyment of timeless elegance for years to come.

HANSATWIST

A continuously updated classic. Highly functional, top-operated and with a swivel spout.

Solutions that facilitate daily kitchen life

The heart of every home

The kitchen is the place where so many of our most precious memories are made. So why not give your kitchen the attention it deserves? With classic, timeless faucets that you can always rely on. For preparing food, washing up or even a glass of drinking water straight from the faucet. Quality that pays for itself.

Flexibility whatever the occasion

Convenient and modern design combined with intelligent functions: the HANSA kitchen fittings add style to your home and facilitate your kitchen life – with practical features such as pull-out showers and swivel spouts.

SMART, safe and hygienic

Our intelligent, easy-to-use faucets additionally ensure a safe, pleasant and hygienic kitchen experience.

HANSAFIT impresses with its touchless function. The integrated LED display warns you when the water is too hot. The optional shut-off valve for the dishwasher reduces the risk of water damage by specifically shutting off the water supply. Our faucets also ensure greater safety in daily use.

Perfectly combined: your kitchen and our faucets

An attractive design coupled with all the functions you need. Take the time and define your precise requirements. Don't settle for second best!

- Sink or wall mounted
- Desired shape of the spout
- Desired functionality of the faucet
- Existing water connection (high or low pressure)
- Positioning of the faucet

The shape of the spout is decisive

The best way to choose the ideal faucet for your kitchen is to ensure it fits in with the sink. For more fun in your kitchen life.

Keeping it clean

To avoid splashing, faucets with higher spouts should not be used with shallower sinks. A faucet with a pull-out spray definitely provides greater flexibility.

Creating necessary space

Deep sinks and faucets with high spouts offer more space for manoeuvring larger vessels.

Ensuring more convenience

Pull-out sprays allow greater freedom of movement, especially at double sinks.

The design of the sink also has a major impact on the choice of the right faucet.

HANSAFIT

It's all a question of technology

With numerous assistance functions, HANSAFIT also sets new standards for technology lovers. The high, swivel spout ensures greater freedom of movement at and in the sink. The easy-grip surface ensures the control elements can be grasped securely even with wet hands. The display on the faucet body indicates the current water temperature in real time. In addition, the hybrid faucet offers touchless operation at a pre-set temperature. For maximum hygiene and even more convenience.

The essentials at a glance:

- Technical finesse and ergonomic design
- Manual or touchless operation
- Temperature display with hot water warning
- Temperature pre-setting via a rotating ring
- Easy-grip operating lever with pleasant surface structure

The hybrid faucet: a new level of convenience for maximum ease of use

For even greater cooking freedom, choose the HANSAFIT Hybrid version with its touchless function, adjusting ring and display, which reliably shows the pre-set water temperature – allowing you to work with exceptional speed at the sink.

The flexible and particularly high-quality silicone hose has a possible swivel radius of up to 120° for maximum freedom of movement.

Lever mixer or optional hybrid variant

Both versions are equipped with an easy-grip lever with a pleasant surface structure for simple and comfortable operation.

Innovative magnetic docking station for simple and secure attachment of the 2-spray hand spray.

Safe: optionally available with electronic dishwasher shut-off valve
Opens at the touch of a button and closes automatically after 4 or 12 hours.

The essentials at a glance:

- Functional design for professional requirements
- Flexible spring hose with integrated 2-spray function: Needle and intense spray
- Manual or touchless operation
- Temperature pre-setting via a rotating ring for touchless operation (HANSAFIT HYBRID)
- Easy-grip operating lever with soft-touch surface finish and contrasting colour
- Swivel spout with a 60°, 80° and max. 120° range
- Scalding protection. Digital warning when the temperature exceeds 42°C

Hybrid faucet for sink, side-controlled, swivel spout, elec. appliance shut-off valve, height: 492 mm, projection: 200 mm

Single-lever mixer for sink, side-controlled, swivel spout, elec. appliance shut-off valve, height: 474 mm, projection: 200 mm

HANSAFIT

Take your kitchen experience to the next level

The semi-professional variants of HANSAFIT allow you to enjoy the features of a restaurant kitchen at home. The high and flexible spring hose enables maximum freedom of movement at the sink. With the 2-spray sink hand shower, you can choose between two different spray types – 'needle' and 'intense' – and adjust the flow of water to your liking. Whether you are washing up, filling pots or washing fruit and vegetables, the faucet is the ideal choice for every kitchen task.

Protection against scalding

The display starts flashing when the temperature exceeds 42°C.

HANSADESIGNO STYLE

Style is never out of fashion

HANSADESIGNO STYLE enables the individualisation of a kitchen according to your needs and is designed with an urban lifestyle in mind. Elegance and functionality merge uniquely to enhance your quality of life – for years to come.

Convenient height and side control

Stylish look and lots of space for manoeuvring large vessels

Swivel spout

Greater flexibility, also when filling heavy vessels at the edge of the sink.

Extractable spout

The 2-spray pull-out shower with soft and needle spray makes cleaning pots and pans even easier. The ideal choice of water stream for every kitchen task.

Digital safety:

optionally available with electronic dishwasher shut-off valve. Opens at the touch of a button and closes automatically after 4 or 12 hours, depending on the setting.

The essentials at a glance:

- Urban aesthetics with practical functions
- Easy to clean thanks to side control
- Height of 239 or 264 mm provides ample space for pots and pans
- 2-spray shower with soft and needle spray
- 360° swivel spout
- Rapid filling with up to 12 l/min

HANSALIGNA

A striking character:

HANSALIGNA gives every kitchen a hint of haute cuisine. The combination of greater projection, faucet height and swivel spout in a modern-minimalist style adds additional freedom of movement at the sink. More convenience can be so easy to achieve! For more pleasure when preparing food and even when washing up. And all this at an eco-friendly consumption level of just 9 l/min.

The spout that projects 189 mm and swivels through 360° not only looks elegant, it also makes HANSALIGNA an extremely capable assistant for all your kitchen tasks.

Single-lever mixer for sink,
side-controlled, swivel spout,
height: 312 mm,
projection: 189 mm

The essentials at a glance:

- Timeless design for modern expectations
- Elegant, clean lines from premium material
- Height of 296 mm provides ample space for pots and pans
- Swivel spout with a 150° range (optional 360°)
- Water saving with up to 9 l/min

HANSAMIX

Work experience since 1979

HANSA has probably gained the most experience with the HANSAMIX kitchen fitting. Already in its fourth generation, it strikes a chord with users due to its classic-functional elegance. Constantly further developed and refined solutions such as the HANSAPROTECT SYSTEM ensure flawless water quality. The high-quality chrome-plated body is available as a top-controlled single-lever mixer or as a wall fitting with a 120° swivel spout. Thanks to the practical hand spray, the HANSAMIX handles even the toughest jobs in the kitchen with ease.

HANSATWIST

Keeping a grip on everything

HANSATWIST creates a visual highlight in every kitchen while the HANSAPROTEC SYSTEM impresses with optimum water hygiene. Either as a high, side-controlled variant or as a low, top-controlled design – the range of fittings is sure to turn heads. Depending on your personal taste, you can choose between two lever variants with HANSATWIST: the classic solid lever or the easy-grip loop lever, with which the water flow rate can be controlled easily and precisely. All you have to do is decide which combination best suits your kitchen.

Saying yes to Water Smart Living means saying yes to faucets which will bring down our water and energy consumption. It is a yes to smart technology which will make our homes, schools, hospitals and public areas safer for the benefit of our health. It is a yes to the decisions which will enable us to create positive changes. For the people and the environment.

This is why we say yes to Water Smart Living!
