

The new HANSA**STELA** range
The perfect combination of style and function

### Beauty that flows from within

Imagine a faucet that lets you experience water in all its glory. A faucet that brings out the beauty of water through its timeless and meticulous design.

### 360° design that leaves no surface untouched

In classic faucets the operating lever needs space to move, resulting in a visible and sometimes glaring gap. With our HANSA**STELA** range we've made sure to keep all gaps to a minimum, for faucets where all movement is fluid and part of the overall design. So you can enjoy their beauty from any angle – no matter where you place them.

With a faucet that provides a fascinating diamond structured waterfall effect, let HANSA**STELA** bring a touch of nature to your washbasin

It wouldn't be HANSA if we relied on looks alone: our innovative aerator is easy to remove and also to clean – meaning you'll never have to worry about a build-up of limescale

# Designed to fit your surroundings with ease

With HANSA**STELA**, we've created a range of faucets as elegant and refined as you are. Faucets made to fit the design and layout of your bathroom with absolute precision, whether you have a freestanding basin sink, built-in solution or anything in between.

Top operated mixers in different styles

XL-Version for free-standing wash basin

Side operated version with smart center position lock for the swivel spout

**Traditional aerator**- extra comfort
Use the adjustable aerator to ensure water flows into the basin without any splashing

### **Ecology & Sustainability**

- Touchless options helping you cut water and energy consumption considerably
- Durable designed to deliver long-lasting performance
- Sustainable set flow rate of 6l/min

### **Comfort, Hygiene and Safety**

- Convenient designed to fit multiple basin types and optimise all spaces
- Hygienic minimal joints, smooth surfaces and touchless variants reduce formation of bacteria and make cleaning easy
- Safe made with eco-friendly materials which preserve water quality

### **Technology & Design**

- Smart Bluetooth\* functionality and multiple operation modes
- Stylish design which can be enjoyed from every angle
- Innovative water flow designed to create a soothing effect

### A perfect balance of design and technology

Whether you experience HANSASTELA as a professional or as an end consumer, enter a new world of faucets – one where technology and design take their inspiration from nature.

### Great technology meets superb design

- · Faucet that delivers a waterfall effect
- · Adjustable aerator so you can match water flow to basin layout – and avoid splashing
- Extensive range available in a number of sizes
- · Touchless functionality for optimal comfort, hygiene and long-term water and energy savings

### **Upgrade every project**

- · Wide range of faucets for a wide range of needs and desires
- Designed for residential and commercial settings
- Easy and quick installation of the versions with HANSA 3S-Installation system
- Enable remote operation via app of touchless bluetooth variants
- Touchless versions with mains or battery power supply
- Consistently reliable technology

### Use the app and enjoy the benefits of touchless technology

With infrared sensors designed to detect hand movement only, wave goodbye to excessive water and energy use – and enjoy a lifetime of savings

- · Choose between three operating modes
- Set flow parameters
- Schedule automatic cleaning and flush mode (to remove stagnant water)
- Easily monitor water consumption
