

# KWC SELECTION KITCHEN

Pure excitement

KWC draws on its long company tradition to ensure that its Swiss quality products make a splash right around the world. Developed and manufactured in Unterkulm in Switzerland's Aargau region, the products are exported to over 50 countries.

#### **Aesthetics**

The extraordinarily elegant design of KWC products raises the experience of simply handling water to a new level. These exclusively processed faucets create a refined atmosphere in any kitchen or bathroom.

#### **Functionality**

Our many years of experience and the continuous ongoing development of our products give them a unique functionality. We also integrate new technologies to achieve hitherto undreamt of improvements in the way they work.

#### **Ecology**

KWC is aware of its environmental responsibilities. We regard the concept of sustainability as a great challenge and incorporate it in everything we do. Thanks to innovative technical features, our products significantly reduce the consumption of water and energy.

#### **KWC is certified in the following areas**

ISO 9001:2000 Quality management systems  
ISO 14001:2004 Environmental management systems  
OHSAS 18001:1999 Occupational health and safety management systems

## Swiss quality

KWC is a Swiss company that sets the benchmark worldwide. As a loyal partner, fair play is an important priority and a conscious responsibility. This is why KWC faucets are still designed and manufactured in Unterkulm, Aargau. The commitment to production in Switzerland is a guarantee of the expertise and skill of the workforce, the constant refinement of tried-and-tested technologies and a consistently high-quality product.

# Prize-winning design

Numerous awards for its internationally leading designs demonstrate the high regard in which KWC is held across the world.

## Moving with the times

Just like the fascinating element of water, KWC too is always on the move. Boldness in making changes and a willingness to innovate have characterized the company since its beginnings in 1874.

# Innovative technology

KWC faucets make the daily business of handling water a real experience. Every detail is perfect, every movement is right, every function is impressive.

## Form and function

Outstanding quality always includes two aspects: the aesthetic form and the functional. It is only what appeals to us that can move us emotionally – and it is only what represents a reliable value that is capable of convincing us over the long term. At KWC, we like to be inspired by nature when designing new faucets so as always to create new, unusual lines from scratch: as durable and resilient as a piece of granite, as impressive and beautiful as a mountain landscape.

# KWC ONO

KWC ONO is a masterpiece of contemporary design: delicately proportioned, made of premium-quality materials, perfectly finished off. Its clear and simple lines give this faucet elegance, grace and strength – so you almost forget how practical, robust and easy to use it is. An artistic creation which adds a touch of subtle distinction to any kitchen.

# KWC ONO

## Simple perfection

KWC ONO stands for sustainability and authenticity. The simplicity of the form becomes a symbol of essential beauty, presented with discreet elegance – and adds a touch of subtlety to any kitchen.

KWC ONO comes in chrome or pure stainless steel. The elegant design and fine finish on the edges and joints will delight you, day after day.

## Perfectionism

Graceful yet incredibly robust: the operating lever on the KWC ONO is made of specially hardened stainless steel, as used in medical equipment. The material is resistant to fracturing and corrosion. The lever operates the cartridge directly, guaranteeing maximum precision.

## Leadership style

The pull-down areator on the side-operated lever mixer, with its stylishly curved design, is particularly smart. It fits seamlessly into the spout and pulls out up to 70 cm if required.

## Customized

Aerated Neoperl® jet or needle spray? A simple touch of a button – and the water flows in the desired mode.

## Character studies

Showing character means expressing individuality. KWC ONO is just one example of a faucet series that is made in various versions for different requirements. Whether it is a top-operated version with a pull-out spray, a pull-out aerator concealed in the elegantly shaped spout or a side-operated model – a good faucet adapts to the demands of its users.

KWC ONO

## An object of prestige highflex® extended water system

Innovative technology in an ingenious presentation. The characteristic highflex® spring hose, in refined black, brings together style, flexibility and top performance. The high arched hose can be guided in any direction, but when at rest – with or without the spray holder – it retains its shape at all times.

DESIGN **PLUS**

Innovationspreis  
Architektur und Technik

## Multiple-hole solutions

Multiple-hole solutions are a useful addition to the range, particularly in the semi-professional area. Whether it is a 2-hole solution with the highflex® spring hose and swivel spout (operated from the side) or a 3-hole solution with a lever mixer fitted separately – everything is possible, just as you like, to suit your individual taste.

## Performance spectrum

Actuating the lever on the spray automatically switches the integrated vacuum diversion over from spout operation to a needle spray.

## KWC ONO touch light **PRO**

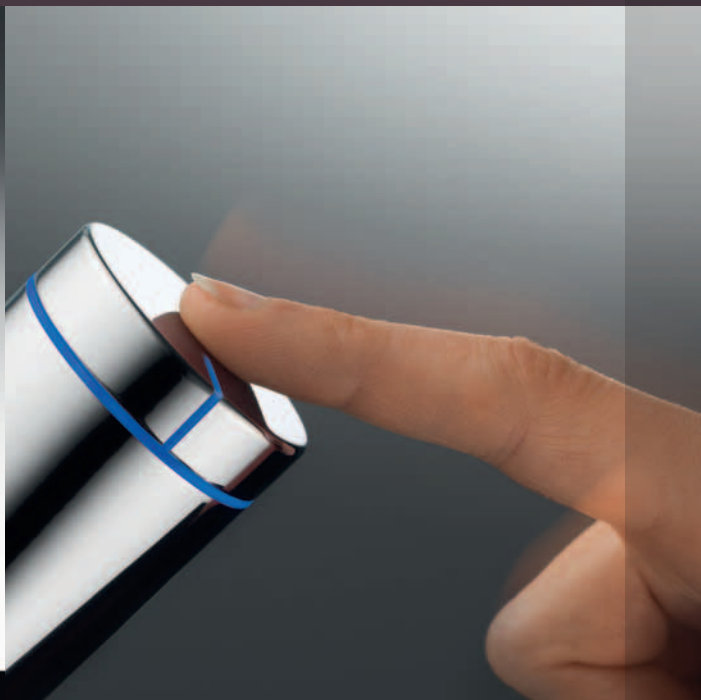

Looking to the future. KWC ONO touch light **PRO** is a product concept with a bright future. The aesthetic appeal of clear shapes is expressed in a purist geometric style which characterizes the world of KWC ONO.

The only thing that is more beautiful is the idea behind the sophisticated electronics, opening up undreamt-of opportunities to the user.

# KWC ONO touch light **PRO**

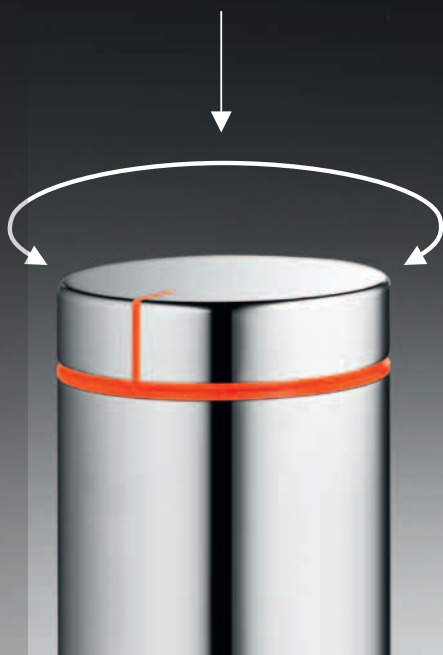

## At your fingertips

The compact operating unit allows the pre-set water temperature and flow rates to be accessed quickly and conveniently. Just tap, and let everything else take care of itself: once for cold (blue), twice for warm (orange) and three times for hot (red). The factory settings can also be changed individually.

## Remote control

The operating unit is also available as a wireless version. Thanks to a magnet, it can be easily removed from the swivel spout head and placed wherever you like in the room.

## Fine-tuning

KWC ONO touch light **PRO**'s operating unit does not just have three pre-set water temperatures and flow rates at its disposal, it also allows individual fine-tuning. A slight turn is enough to get the temperature just right. To adjust the water flow rate, press and turn.

## Flexibility is the principle

The water spout and water mixer are two separate components. You choose the position and alignment of each.

# KWC LIVELLO

KWC LIVELLO is a high-quality kitchen faucet that meets the highest expectations. A transverse body and clear use of forms characterise this innovation, which adds a welcome touch to sophisticated residential buildings.

# KWC LIVELLO

STAINLESS STEEL

## All-round flexibility

Through a swiveling range of 360° and the aerator that can be pulled out by up to 60 cm, the radius of action is increased considerably so that, when working in the kitchen, you are literally not kept on a short leash.

## Design

The horizontal pull-out aerator gives KWC LIVELLO its uniqueness and profile. On installation, the lever can be positioned on the right or left, or in front.

## Operation

Simple aesthetics, well-conceived to the smallest detail: KWC LIVELLO is available in chrome or stainless steel, each version using a different design of operating lever.

# KWC INOX

KWC INOX manifests its high quality at every glance and touch, and this can be summed up in two words: stainless steel. The pioneer in matters of material quality is also the obvious choice, with its clear forms across the whole line. The elegant, sparse, sleek design and unequivocally precise ease of use guarantee a sparkling appearance for KWC INOX in any modern kitchen.

# KWC INOX

## Play of light

KWC INOX is also available as an elegant two-hole solution with LUMINAQUA®. While the minimalist shape of this stainless steel faucet makes it really easy to operate and clean, the LED lighting, incorporated in a transparent plastic ring, envelops the flowing water in a bright glow.

**LUMINAQUA®**  
Advanced Light Technology

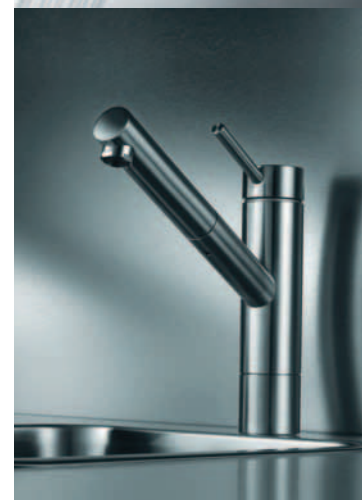

## Freedom of movement

Practical: the pull-out aerator with an operating range of up to 70 cm in pure stainless steel finish.

## Everything you could ask for

Sophisticated: the alternative with pull-out spray and diverter for Neoperl® and needle spray.

Variable: the model with an optional socket extension for more space under the spout.

## Creativity and emotion

Evoking emotions is part of the high art of good product design. In addition to perfect functionality, it is therefore always important to create moods, to stimulate all the senses and to open the heart to aesthetics. By adopting a creative, innovative approach to shapes, colours, materials and technologies, KWC time and again produces faucets with a 'soul' that can touch and enthrall, by appealing to the emotions as well as the rational mind.

KWC **SIN**  
KWC **USO**  
KWC **EVE**

pages **36 / 78**  
pages **44 / 78**  
pages **48 / 79**

# KWC SIN

There is no place more sensual than the kitchen, with its tantalising aromas, incredible flavours and tempting ingredients for the very latest creations in cuisine. KWC SIN enriches the culinary world. This range, available in four different versions, makes an impressive impact in terms of both its stylish design and functional versatility. In short, KWC SIN stimulates your senses just as much as it appeals to your good sense.

**DESIGN PLUS**

KWC SIN

## highflex®

extended water system

KWC SIN highflex® is a world first, uniting two innovative functions: two spray modes (filtered stream/Neoperl® spray) with the flexible, patented highflex® spring hose and a swivel spout.

- Spray with highflex® spring hose: when you lift the spray out of its bracket, the highflex® spring hose offers plenty of flexible room for movement in all directions.
- Swivel spout: when the spray is placed in its bracket, the result is a stable swivel spout with a swivelling range of 360°.

# KWC SIN

## Unlimited flexibility

High flexibility and stability combined. The highflex® spring hose is specially designed so that it always returns automatically to its original position. It therefore constantly maintains its elegantly curved profile. When the spring hose is placed in the hand-spray bracket using the positioning aid, the result is a stable swivel spout that can be rotated around 360°.

## Design

Harmonious design and a sculptural aesthetic are combined with maximum flexibility and a variety of functions that leave nothing to be desired. This enables the range to satisfy the very highest standards in terms of materials and the quality of the finish.

## Water as you like it

Besides the sophisticated highflex® spring hose, the spray on the KWC SIN highflex® also has what it takes to impress: the spray can be rotated 360° and can be switched between a powerful Neoperl® spray and a gentler filtered stream using the diverter button.

# KWC SIN

## Pull-out aerator

True quality often only reveals itself at second glance. And that is certainly true of KWC SIN with its pull-out spout integrated almost invisibly into the hose-guide aerator. The slender, curved faucet can be swivelled 360°, creating real, all-round flexibility.

## Swivel spout

Elegant yet practical. With its highly curved swivel spout, KWC SIN offers maximum clearance for all types of cookware – even large pots and pans.

## Pull-out spray

Elegance with added value. With this version of KWC SIN, the spray integrated into the 360° swivelling hose guide can be pulled out and extended by up to 50 cm without a sound, thus giving you the room you need to be creative in the kitchen. The pull-out spray itself can also be rotated around its own axis – all the freedom you could possibly ask for.

# KWC USO

Electronic faucets are a law unto themselves. The quest for perfection is still the top priority, but a balance has to be found between aesthetics and technology, elegance and electronics. The best example of this is the KWC USO: a wonderful piece of design that swathes the beauty of the flowing water in carefully regulated colours – and shows off the qualities of LUMINAQUA® LED technology in the very best light.

**LUMINAQUA®**  
Advanced Light Technology

KWC USO

1x  
on/off

## TIPCONTROL

Three levels, three colours

Just touch the spout and the water becomes coloured: once for cold (blue), twice for warm (orange), three times for hot (red). The cleaning mode (green) is activated when you press the spout for five seconds, and it switches itself off automatically. The water flows for 10 seconds (factory setting).

Minimalist in shape, refined in the diversity of its functions, KWC USO perfectly complements the workspace of the modern kitchen. A faucet full of character, with a harmonious overall image – and which gives outstanding service in everyday use.

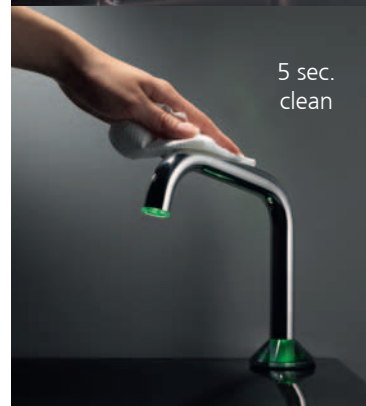

2x

3x

5 sec.  
clean

# KWC EVE

KWC EVE is a shining example of KWC's creativity and innovation. The unique combination of high-quality metal (stainless steel or chrome) and a stream of water subtly illuminated by LEDs creates a sculpture of light that beguiles with its slim, curved and feminine outline, transforming it into an object of desire. This is complemented by truly sophisticated functionality that makes KWC EVE an absolute high-light with no compromise.

**LUMINAQUA®**  
Advanced Light Technology

# KWC EVE

## White magic or black beauty

Contrasting colours are united by a common style. Whether it is the silky smooth glacier white surface, reminiscent of Corian®, or the black chrome-plated KWC EVE which sets the visual tone, the distinctive, elegant shape and advanced technology of this faucet will never fail to delight the most discerning user.

## A shining example of diverse functionality

LUMINAQUA® allows light and water to interact. At first glance, the light ring is integrated invisibly into the aerator, which can be pulled out by up to 60 cm. The LEDs have a service life that extends for years and use a minimal amount of power. Practical and economical: the light switches off automatically after 45 minutes.

## Peace and harmony

Feel safe and secure. The desire for harmony is a human longing that finds particular expression at home, within one's own four walls – and rightly so. This is where we like to be, this is where we like to be able to rely on things. KWC takes the desire for reliability very seriously – with faucets that stand out thanks to their precision, long lifespan, diversity of functions and timeless design. With all these aspects, the focus is on one thing: outstanding Swiss quality.

pages **64 / 85**

# KWC AVA

KWC AVA turns the daily interaction with water into an experience of sparkling pleasure. The combination of cylinder and cube forms a single harmonious unit that makes many things possible – and all things a little easier. Simply beautiful. Simply water.

## Far-reaching

The pull-out spout fits comfortably in your hand and gives you complete freedom of movement at all times. Being able to pull it out up to 70 cm may be crucially important in the kitchen.

## Aesthetic appeal across the whole series

Whether it is a swivel spout, a version with a pull-out spray or pull-out aerator (operated from the top or the side), or an elegant soap dispenser that matches the range – KWC AVA presents winning solutions across the whole range.

# KWC BLISS

KWC BLISS is – as the name suggests – a godsend in the modern kitchen. Slim and as shiny as a mirror: the playful line and brilliant design set a stylish note and transform the faucet into an eye-catching feature that is simply and thrillingly fun. Incidentally: KWC BLISS is the perfect solution, even for smaller budgets. Of course, without having to take shortcuts in matters of operating convenience and quality of workmanship.

# KWC DOMO

KWC DOMO is a real classic and has become virtually synonymous with kitchen faucets over the years. Since it was first launched in 1982, this successful model has been subtly redesigned a number of times, and so it has always remained contemporary.

# KWC ORCINO

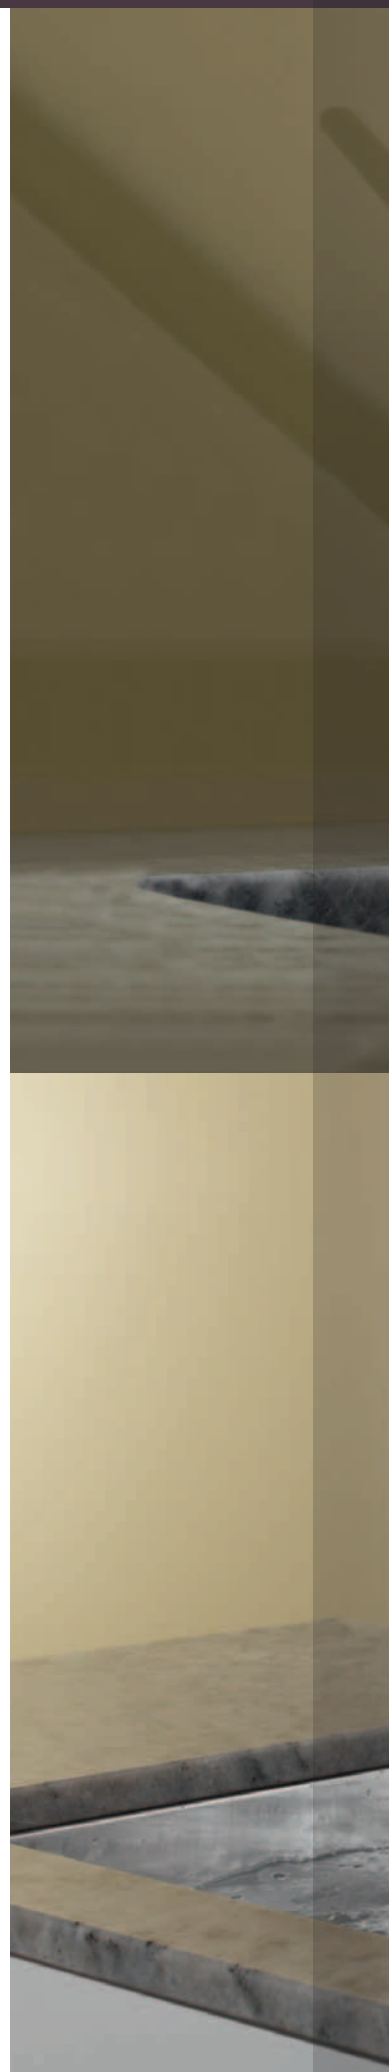

With its graceful lines, KWC ORCINO brings a feeling of lightness to the kitchen, elegantly combining classic faucet design with features that give the series an unmistakable look. Winning technology makes KWC ORCINO a reliable kitchen helper that, thanks to its special charm, is always in the spotlight.

# KWC LUNA

KWC LUNA is a faucet range full of beauty and character. On the one hand, there is the harmonious, slimline design, and on the other, an impressive array of functions – not to mention the knowledge that this premium product is setting new standards in an attractive price range.

# KWC soap dispensers

KWC soap dispensers are in tune with the trend towards uncluttered, functional kitchens. They match the various different ranges in design and character and, with their discrete elegance, create an atmosphere of order and clarity.

# KWC soap dispensers

## Maximum functionality

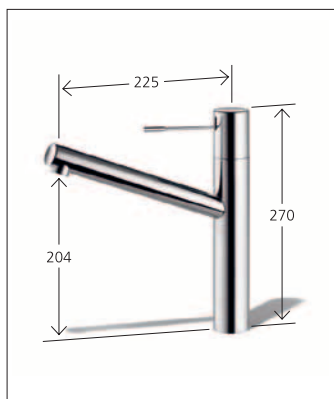

The large soap container (concealed beneath the sink) holds 300 ml, and has an ingenious system that allows it to be filled from the top. KWC soap dispensers – a little bit of luxury that has become an essential.

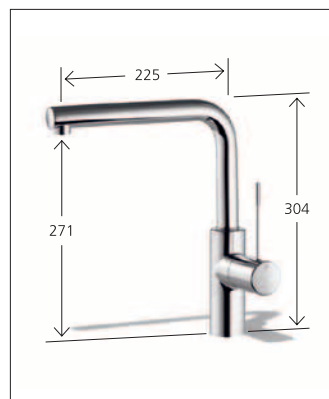

# KWC ONO

KWC ONO is also available for the bathroom.

## Technical information

The applications of kitchen faucets depicted in this brochure are for illustrative purposes only. Technology and design may change as a result of continuous product development. The suitability of the faucets must be checked for each property.

For planning and technical implementation, the specifications in conjunction with the assembly and servicing instructions of KWC AG will prevail exclusively. Appropriate information can be ordered from KWC or obtained via [www.kwc.com](http://www.kwc.com).

Subject to technical, range and model changes. Dimensions in mm.

## KWC – big in bathrooms, too

All the information on the world of KWC bathroom faucets can be found here:

- brochure: KWC Selection for bath faucets
- Internet: [www.kwc.com](http://www.kwc.com)
- Smartphone: [mobile.kwc.ch](http://mobile.kwc.ch)

'Thinking sustainably means incorporating future-proof technologies as well as good sculptural design that will still be contemporary tomorrow.'
