# Bathrooms are evolving

to meet the needs of the contemporary consumer. The modern bathroom is smarter and more efficient than ever before. In addition to centres of hygiene, bathrooms have become relaxing spaces of self-care and healing, the place we return to in order to escape the chaotic bustle of the world outside and give ourselves those moments of wellness which are proving ever more important. We believe that a good bathroom space is fundamental. We believe in what connects us, in what makes our lives simpler, safer, and more enjoyable. Our experience allows us to design and manufacture the products that give you the freedom to make your space exactly what you want it to be, tailored specifically to your personal needs and desires.

From our headquarters in Barcelona, to our design centres and 76 factories around the world, we work tirelessly to provide you with your best bathroom experience. In this edition of *Everything in Bathrooms*, you'll not only learn about our entire range of bathroom products, you'll also find tips to create your bathroom space, just how you want it. On the following pages you'll discover the latest in smart bathroom technology, how to use colour to breathe life into your space, tips on how to keep your bathroom organised at all times, and much more. We want to show you our range of products and inspire you as you create your personal space of comfort and wellbeing.

## Next-Gen Tech Taking Comfort to New Heights

A steaming hot shower that remembers the ideal settings of each member of the household. An electronic toilet with a gentle multi-setting spray nozzle and LED night-lighting. A mirror that defogs at the touch of a button. It's not science-fiction, it's reality – and Roca's got everything you need to make it a part of your home.

This year, everyone's talking about smart bathrooms. The latest generation of bathroom technology is greener, more functional and more connected than ever before. But comfort and wellness remain the essence of the smart bathroom, and for as much as these new technologies propel the bathroom experience into the future, they are firmly rooted in the comforts that have defined bathroom rituals for generations.

# Smart Bathrooms

# In-Wash® Insignia

The ultimate smart toilet  
Make room for the  
connected WC

Consider Roca's In-Wash® Insignia smart toilet, with innovations that are as progressive as they are intuitive. It still consists of the essential elements: seat, bowl, water. Though now, the seat can be pre-warmed and opens and closes automatically, via a built-in presence motion sensor. The bowl is Roca Rimless®, which makes it more hygienic and easier to clean. And the space-saving tank, integrated into the bowl, has an optimised flush in comparison to earlier models. Each element has been reimagined and optimized according to user experience and functionality.

The most notable evolution comes in the form of an integrated water nozzle that provides fully customizable washing and drying functions for intimate hygiene. The position, pressure and temperature of the water and air can be controlled either via a remote control or an app for smartphones. When you're finished, effective drying technology directs air precisely where it is needed.

Other features such as the deodorizer, Supraglaze® glazing and LED night light complete this enticing package. The toilet self-cleans using both water and UV lighting, to ensure the most hygienic experience with minimal hands-on maintenance.

At the heart of the smart bathroom is Roca Connect, a solution for managing the data of your bathroom. Roca IoT service monitors water consumption and issues warnings, alerts and saving insights thanks to integrated systems in In-Wash Insignia. The settings and features can be adjusted through a mobile app, and statistics are constantly gathered regarding the use of water so you can know how much water each user is consuming at any time.

### New wash

New technology in the nozzle, for a softer and more efficient front wash and a more personalized rear wash, with the innovative Multi-Stream.

### Automatic functions

A presence sensor activates and deactivates functions when the user approaches. The opening and closing of the cover, the cistern flush, the guiding LED light, or the deodorising system can also be set up.

### Integrated cistern

The space-saving In-Tank® technology integrates the cistern into the bowl, enabling its installation anywhere and unifying the overall aesthetics, as well as making it easier to maintain. The Roca Rimless® Vortex design provides a powerful flush with a whirlwind effect.

### Easily removable heated seat

The seat, manufactured with an exclusive antibacterial material, can be easily removed to make cleaning and maintenance easier. Users can select and programme the temperature of the seat.

### Coanda drying effect

Fluids tend to follow the curvature of a nearby surface. This is the Coanda effect, the principle behind the design of the In-Wash® Insignia nozzle. It directs the air to the washed area, achieving fully effective drying.

### Maximum hygiene

In addition to featuring the Supraglaze® glazing, an optional flush with sanitising liquid, and its maximum hygiene nozzle also cleans itself before and after each use, and its UV light removes 99,9 % of all microorganisms.

# In-Wash<sup>®</sup> Ona

Smart made simple  
Enjoy Roca's In-Wash<sup>®</sup> technology

Inspired by the warmth of the Mediterranean, the new In-Wash<sup>®</sup> Ona is a smart toilet with a totally intuitive washing configuration interface, with high drying capabilities thanks to the Coanda effect, and with the control and personalization that Roca Connect delivers. What's more, In-Wash Ona seamlessly integrates design and hygiene with organic lines inspired by natural forms, is a smart choice for the bathroom.

---

 Wall-hung

---

 Back to wall single floorstanding

---

 Close-coupled

---

### Intuitive use

Extremely easy to use with a side round button and panel, its functions can also be controlled via the mobile app.

---

### Personalised wash

Oscillating front and rear wash with adjustable pressure, temperature, and position and more effective drying with the Coanda effect. The rear wash includes a mixture of air for improved performance.

---

### Design

Modern and soft shapes in a toilet that is available in three versions: wall-hung, back to wall single floorstanding, and close-coupled.

---

### Comfort

Details like the soft close seat cover and night light enhance the user experience.

---

### Maximum hygiene

With a self-cleaning nozzle before and after each use and UV light to guarantee hygiene, it features the Roca Rimless® design and Supraglaze® glazing to make cleaning easier.

---

### Easy cleaning

Removable seat and integrated water descaling system.

# In-Wash® Inspira

A smart toilet for every  
bathroom space

Wall-hung with In-Tank®

Back to wall single floorstanding  
with In-Tank®

Wall-hung

Back to wall single floorstanding

Back to wall close-coupled

The In-Wash® Inspira collection features a wide range of installation options for every household and bathroom space, with a minimalist and compact design

and no visible wires. Regardless of the design or installation option you require, you are bound to find an In-Wash® Inspira that suits your project.

# Multiclean® M4

Today's technology,  
for everyone

With a slim and modern design, the latest generation of seats with personal hygiene technology brings all the advantages of intimate washing with water to Roca's traditional WCs, by only changing the toilet seat and cover.

Multiclean® M4 transforms the WC into a true smart toilet with washing and drying technology, a self-cleaning nozzle and an entirely personalised experience, thanks to Roca Connect.

---

Compatible with several Roca WC collections.

---

Modern and minimalist design.

---

Personalised washing and drying functions.

---

Comfort seat.

---

Connectivity through Roca Connect and mobile app.

---

Easy to use, thanks to its side panel with round button.

## Smart Showers

It's in the shower that smart tech is at its most pleasurable – and Roca's Smart Shower technology begins before you've even stepped inside the shower itself. From the app, you can instruct the shower to pre-heat to your desired settings, so that at each step of the way your experience is personalised according to your exact needs and desires. Should you wish to adjust the temperature or pressure of the water once inside, the settings can be altered at any time with precision via the LED control panel.

Once you've decided how you want your settings, all that's left is to sit back and enjoy a shower experience like none other. The control panel also allows you to change which outlet (overhead,

hydromassage column, or both) the water comes from. To pause the shower and lather up, you need only push a button – when you're ready for the water to come back on, just push the button again and it will return at exactly the setting you left it.

Once you leave the shower, you can activate an integrated cleaning programme that releases high levels of pressure from the outlets, removing limescale and other impurities from pipes and jets. It's a safer shower too – the temperature control settings (which by default go to 38 degrees and have to be deliberately activated to go higher) make it more difficult for children, the elderly and other at-risk users to suffer burn injuries.

## Smarter Bathrooms for a Healthier Planet

Smart tech is more than just cool gadgets (although it's got those too) – it's also greener than before. Smart bathrooms allow for significant water and energy savings. For example, Roca Connect keeps track of the amount of water used by each person and the total amount of water from all users, thus raising awareness of water consumption and encouraging responsible habits. And their personalised control settings mean no more pesky switching between scalding hot and freezing cold while you're looking for your desired temperature and pressure in the shower – making for a more pleasant experience for you and creating serious savings of water and energy over the course of a year. With the average shower using a litre of water every seven seconds, these minutes spent trying to get the settings right are better for the planet and can save you significant money on water bills at the end of the month.

Smart bathrooms apply the best of smart technology – customization, data analytics, improved user experience – while enhancing the timeless experience of comfort and wellness that define the bathroom moment and improving our daily routines. To call it the future would be a misnomer: The smart bathroom is already here.

---

With five bathroom furniture collections making their debut in 2023, Roca presents a gamut of styles to create a contemporary and well-considered bathroom space. From the tiniest under the stairwell half-bath to a voluminous open-plan master bathroom, a furniture collection that is beautifully designed, well-crafted and fits your needs can make all the difference.

# Bathroom Furniture to Gain Space and Style

## Horizon

Roca is known for pushing forward the possibilities in bathroom furniture textures and finishes. Case in point: the fresati wood finish found on the Horizon collection. This unique wood formation with vertical slats immediately gives a sense of luxury, particularly when balanced with its cast marble countertop. This distinguished wood finish looks as good in a well-appointed townhouse as it would in a countryside chalet. Pair it with one of the Horizon collection's sophisticated, contemporary basins for a winning combination.

## Inspira

The striking contemporary design of the Inspira collection is complemented by its versatility. Units can come as two drawers stacked together or as an individual one-drawer unit that is slightly skewed or separated from the Fineceramic® wash basin, a great space-saving technique for smaller bathrooms. Basins are designed in round, soft and square formats to find the best fit with any space and piece of furniture. The handle can contrast with the rest of the unit (such as a white set of drawers with an accented metallic handle), or be a seamless, single-colour finish. Units can come in dark wood, light wood, matt white, matt terracotta or matt sand finishes.

## Tenue

The Tenue collection's compartmentalised drawers have been laid out to make organising easy, both for larger and smaller bathroom necessities. The storage drawers are outfitted with a streamlined handle set at a 45° angle in a straight line with a crisp edge finish (characteristic of higher-end units) and an on-point detail that allows for simple opening and closing. A Stonex® washbasin sits elegantly atop this unit, and the furniture can come with a matt white, matt black, onyx, night blue or pearl finish.

## Optica

Modern, clutter-free bathrooms start with well-designed bathroom furniture. Optica is optimized for flexibility and style. This furniture unit comes with two drawers and ergonomic handles which are subtly integrated into the unit and simple to use. These units pair with glossy white Stonex® unik washbasins or with three different ceramic finishes in over countertop solutions. Matt white and night blue surface finishes are timeless classics, while three wood surfaces in light, medium and dark work great for Scandi-modern looks as well as rustic-chic.

## The Gap

The Gap is a functional collection that scores high in adaptability. It is designed with numerous configurations and sizes in mind: wall hung units and floor standing cabinets, multiple sizes and a variety of colours, adjusting to individual needs with ease. The Gap furniture units embody this style with a variety of finishes, including the classic Nordic ash, light blue and light grey. The use of responsibly sourced wood finishes is increasingly sought after in the bathroom space, for a natural, Nordic feel that gives a sense of warmth and comfort.

Finding bathroom furniture that adapts to your needs is essential, and contemporary ranges of furniture are designed with versatility and style in mind. The right piece of furniture not only gives more storage and extra space, it can unlock the latent potential in the bathroom as well.

---

# Basins With Personality

Now is the moment to go for a striking over countertop basin in your bathroom

The basin is increasingly becoming a statement piece which no design-conscious homeowner can afford to take lightly. While the basin's basic functions remain the same as ever, the past decade has seen a wave of exciting new designs that question long-held beliefs and explore new forms. This has been made possible in large part due to new technologies such as Roca's Fineceramic® material, which allows for pieces that are lighter and finer than ever before, and for the design of shapes and dimensions that were previously not viable.

Over countertop basins are especially on-trend this year. These bold designs

free the basin from its traditional setting on a pedestal or in a vanity, daring to put its form on display and reimagining what shape it can adopt. Here, we take a look at some of Roca's most exciting new basin designs and how they can give a fresh look to your bathroom space.

Installing a unique over countertop basin in your bathroom is a simple and effective way to bring both cosy and contemporary feel to your bathroom space. Roca also offers other over countertop options in collections such as The Gap (round or square), Inspira (soft, round or square), Beyond and Bol.

“The design is like the sea horizon, recalls the movement of water, of waves, the ocean, elements of Nature.”

RUY OHTAKE

## Ohtake

The Ohtake collection was created by the late Brazilian architect and designer Ruy Ohtake, who throughout his life took inspiration from forms found in nature: the sea, the sky, and what he considered the purest form of design, the egg. His collection for Roca unites these elements in a set of functional yet playful basins in a variety of colour options. With their flowing curves and wavelike forms, Ohtake basins are guaranteed to make a splash.

## Horizon, Geometry in Motion

Horizon's basins take their inspiration from the lines of the urban environment: intersecting streets, the play of light and shadow cast by buildings, the line of the horizon in the distance. These striking, geometric basins engage the eye as they play with dimension, angle and slope. The basins' straight, crisp lines and fine edges would be difficult to achieve by traditional methods, but were made possible in this collection by employing Roca's exclusive Fineceramic® material, which is both lighter and more durable than normal ceramics.

## Inspira, Inspired Shapes and Forms

The Inspira Collection offers multiple possibilities in the bathroom space and is designed with three distinctive styles: round, square and soft, a new design that blends rounded forms with angular lines for a unique look. The washbasin is available as over countertop as well as an integrated Unik basin, and is made with Fineceramic®, the innovative, high-performance ceramic material that adds a sense of lightness to the basins and allows for thinner walls and more sculptural designs. The basins are available in several finishes, including glossy or matt, with colour choices such as beige, coffee and onyx.

## Ona, Mediterranean Lifestyle

The Ona collection is one of Roca's latest collections for the bathroom space. Inspired by Mediterranean architecture and design, these basins are a subtle composition of elegant curves, soft lines and warm colours. Ona offers bold over countertop basins that can pair with any surface, or in countertop options which integrate seamlessly into one of Ona's stately, storage-conscious furniture units.

## Optica, Modern, Urban Style

With its versatile circular, square or semi-circular shape, Optica offers a new take on the classic basin. Simple, organic forms are light, durable and easy to clean, making them a practical choice for the modern bathroom. The ceramic basins are available in a variety of colours and finishes, so there is sure to be an Optica basin for every bathroom space.

# A Touch of Colour

---

Colour is finding its way into the bathroom space in unexpected and delightful ways. This intimate and personal space, where we spend a good amount of time each day, should reflect a sense of joy and personality, and colour is a great design element that can create that possibility. Update your bathroom with painted walls, colourful ceramics, or bold pieces of furniture. Decide your style and find the best way to apply colour to your bathroom space.

### **Create a colourful wall**

Painting the walls is often the first idea that comes to mind when thinking about sprucing up your bathroom with a bit of colour, and it certainly can transform the space. A wall of colourful ceramics can also make a bold statement without taking over the whole bathroom. Subtle pastel colours, such as yellows, light greens, soft blues and pinks, have long been popular in the bathroom, though increasingly, dark tones, such as dark brown or brick red, are also being used.

**Make a statement**

One way to add colour to your bathroom, without touching the walls, is to add a colourful piece of furniture as the centrepiece of your space. Choose units to set the mood and complement your chosen style, such as glossy white for an urban look or wood finishes for a modern Scandinavian or rustic-chic aesthetic. Go bold with the blue Optica unit, which will stand out against a white, light blue or grey wall. For a modern look, Inspira's sleek and stylish pieces allow you to combine different colours, such as terracotta, matt white or natural wood finishes, with a contrasting dark, metallic profile. Go one step further and create a unified space with matching accessories from the Ona collection. Available in a muted palette of colours (white, green or sand), Ona's four pieces of accessories combine perfectly with the bathroom furniture in the same range of colours.

### **Metallic finishes for stylish bathrooms**

Chrome's silvery hue is a timeless, modern classic in bathroom fixtures, but new metallic colour tones are turning heads, particularly rose gold. Rose gold is not shy about its beauty. Luxurious, contemporary, with an innate appeal, it mixes seamlessly with white, black or brown washbasins adding in a pop of radiant energy into the bathroom space.

### **Black or White**

Elegant and timeless, black adds a sophisticated and classic touch and can easily be combined with accessories in other colours. Enter the new matt white faucets of the Cala collection and accessories of Hotels collection, a new range in the design of bathroom spaces. Black and white never go out of style and now you don't have to choose which one to use in your bathroom design; use white for a clean and fresh feel and add black to give your space more depth and richness.

**In seventh heaven**

You're spoilt for choice when it comes to colours for your washbasin. Keep it simple and timeless with glossy or matt white, choose onyx, pearl, beige or coffee for a neutral and elegant look, or add a touch of sophistication with our newest addition, matt black, available in our newest washbasins. Create a real sensation by adding the beautiful Ohtake matt black washbasin, a design sure to impress and stand out in your bathroom space.

Whether you choose bold hues or warm tones, mix and match or stick to one colour, now is the time to get inspired with a touch of colour in the bathroom space.

---

# 6

## Tips to Keep Your Space Clean and Clutter Free

If you're like most bathroom users, you use your bathroom space for more than just a toilet and shower. It's where you begin your day, and it's where you end it. It's where you perform your daily routines to keep yourself looking your best. You are likely to have more than a few products that you've accumulated over the years.

Perhaps you have some mascara, lipsticks, lipliners, lip balms or lip glosses. Perhaps you have concealers, foundations, blushers, highlighters, brow pencils, eyeshadows, eyeliners, nail polishes and removers, as well as cleansers, moisturizers, serums, toners, facial scrubs and sunscreens for face and body. Perhaps you share this bathroom with someone who uses shaving cream, a razor, hair

gel, cologne, cotton swabs, contact lenses, face wash and aftershave, and perhaps each of you has a toothbrush, toothpaste, mouthwash, dental floss, nail clippers, combs, brushes and deodorants. Perhaps all these things are mixed in with an assortment of devices which compete with the hair dryer for space in the outlets.

The bathroom should be an oasis of calm and relaxation, yet no room in the house is capable of spiraling out of control faster. Trying to arrange dozens of small products around a relatively small water source can sometimes feel very stressful. Roca offers a variety of simple and inexpensive solutions that can be the perfect antidote. Here are a few top tips to get your bathroom in order.

# 1

## Keep it hung up

Wet towels have no place on the backs of chairs or the corners of doors – and least of all on the floor. Aside from being unable to dry properly, discarded towels can sprout mould and spread germs throughout a bathroom. Nip this problem in the bud by installing a towel rail near your bath or shower, or for multiple users, a towel rack. Heated towel racks get the job done in a fraction of the time.

If you have limited space, consider robe hooks. Line up several in a row so each family member can hang their towel easily. Whether you own a robe or not, robe hooks are great places to hang clothes, towels or hand towels in the bathroom.

# 2

## Keep it off the counter

Soap and bathrooms go hand in hand, but when soap bars are left directly on the countertop, they can cause mould or discoloration. Soap dishes help soaps last longer and keep your counters clean. Soap dishes help soaps last longer and keep your counters clean. Soap dispensers for liquid soaps can match your bathroom's decorative scheme and are a great way to tie the room together. Roca offers both dispensers and dishes in a variety of finishes, with countertop or wall-mounted options.

Magnifying mirrors (also called zoom mirrors) can do wonders when it comes to applying makeup, shaving or any other grooming ritual. But when they sit on the counter they occupy valuable space, and the user often has to bend down to reach them. A wall-hung magnifying mirror gives you all of the functionality with none of the headache.

# 3

## Keep it germ free

Bathrooms are supposed to be sanctuaries of cleanliness, but clutter and carelessness can turn them into a hotspot for bacteria. All those disposable contact lenses, cotton swabs and makeup removal pads need a place to go after use. Make sure to have a waste bin handy for those small items which can pile up so easily if left unchecked. For most bathrooms, a small three to five litre waste bin is sufficient to keep things looking tidy. Toothbrushes (or any other item that goes in your mouth twice a day) have no business lying flat on the countertop where they can pick up germs and bacteria.

Tumblers are great all-purpose containers that help keep toothbrushes and toothpastes clean and fit for use. Last but certainly not least, anywhere one has a toilet, a toilet brush and brush holder is of the utmost importance. The brush keeps the toilet clean, and the holder keeps the brush contained. Consider a wall-hung version as a stylish upgrade to the typical toilet brush holder, which also makes for easier cleaning of the floor area.

# 4

## Keep it handy

There's no right way to store your toilet paper, but there is a wrong way. Besides giving a sloppy impression, if your toilet paper is on the floor or the edge of your countertop, it could be picking up extra germs. Make your life easier by installing a toilet roll holder within easy reach of the toilet.

The shower zone sometimes gets a free pass as far as organization goes, but it shouldn't be ignored, and you would do well to keep things like razors and slippery soap bars away from bare feet. Grilled containers are perfect for shower storage, keeping the profusion of small objects handy and organized. What's more, the grill design lets water fall straight through, inhibiting the build-up of bacteria.

# 5

## Keep it stored away

Mirror cabinets serve the same function as flat mirrors, but they open on a hinge to reveal a set of shallow storage shelves within, giving you instant bonus storage while taking up zero additional space. Makeup and other small toiletries are perfect for these spaces. Roca's Eidos mirror cabinet comes with an integrated LED light and a built-in electrical socket.

Bathroom cabinets are one of the top storage solutions for the bathroom space. They integrate the basin into a

furniture cabinet, providing storage below while leaving the top free for other, more frequently used items. They can be floor-standing with legs, or anchored directly to the wall for easier cleaning underneath. Inside the cabinet drawers, an organizing tray will keep your smaller items all in one accessible spot. For larger items, like towels for example, which take up a lot of space, yet need to be kept close at hand, an all-purpose auxiliary storage column is your best bet. Stylish and subtle storage columns offer maximum storage while occupying little floor space.

# 6

## Keep it organised

Clutter can build up in a bathroom drawer in no time. They are perfect receptacles for keeping brushes, combs, makeup or medicine hidden away, but try to find that favourite lipstick or to remember what is even stored in the drawer, and it soon becomes a mystery, a space where items go to be forgotten. Well-designed drawer trays and integrated storage dividers in furniture units are a simple way to get organised, while also saving space. Collections such as Inspira or Ona have built-in storage dividers. Use longer sections for combs and brushes, smaller squares for extra bars of soap or hair ties, whichever way you use the space, maximise their potential and get better organised as you do.

Even the nicest bathrooms can take on an air of sloppiness if they're allowed to become overrun with a thousand random objects. By staying on top of organization, you'll make your daily routines a whole lot simpler – and you'll also be keeping your bathroom looking its very best.

---

# Build Your Dream Shower

The shower is a space of wellness, comfort, rejuvenation and pleasure, where elements as simple as a stream of water and a transparent, thin piece of glass are capable of blocking out the troubles of the outside world. The shower is one of the most important rituals of the day, the wellness moment *par excellence*. A good shower can wash away not only dirt and germs, but also worries and petty annoyances.

As such, it is a place that cannot be overlooked. Here, are some elements which can give your shower that extra bit of comfort and guarantee a moment of pleasure in your daily life.

## Thermostatic Mixers

### Find Your Perfect Temperature

An easy way to immediately upgrade the comfort of your shower is to install a thermostatic mixer. These let you jump right to the exact temperature you want and stay there, with no pesky jumping between hot and cold. The result is your ideal shower setting from the first moment.

#### T-500

Roca's T-500, with sleek ergonomic handles, offers a wide range of options for showers or bath/showers in chrome and black.

### Index-T Switch

Roca's latest is the Index T-Switch, a full-sized telescopic shower column with thermostatic control dials which regulate the flow and temperature of the water.

## Shower heads

### Let it Rain

As their names suggest, Rainsense and Raindream shower heads -made from ABS and stainless steel, respectively- offer a full-body downpour of soothing overhead water.

These shower heads have been designed with relaxation and gratification in mind. Their slim design and variety of colour and finish options gives them a contemporary look that will bring a keen sense of sophistication to any space

## Shower Trays

### A Seamless Solution

Removing barriers in the bathroom space also extends to shower trays. A floor-level shower tray gives an inviting sense of unity to the bathroom and makes the shower more accessible.

Paired with a transparent enclosure, these shower trays can breathe new life into a bathroom, integrating the shower into the space and creating a feeling of cohesion.

### **Terran**

Manufactured in Stonex®, Roca's most versatile shower tray is updated with an original gravel texture, shifting the drain sideways for greater comfort and adding three grid designs in eight finishes.

**Cratos**

All hygienic properties of Senceric<sup>®</sup>, Roca's exclusive and antislip ceramics in an extra-slim design with five finishes.

**Pyros**

The integrated fast-flow drain is the unique feature of this extra-slim, elegant, and minimalist shower tray, available in several finishes on a sandy texture.

**Granada**

With a neutral design, this shower tray, manufactured in acrylic, features a perimeter frame and a slightly raised design to leave room for the trap and make its installation and maintenance easier.

## Shower Enclosures

### Open up the Possibilities

Gone are the days of opaque walls or plastic curtains. The modern shower should not be divided from the rest of the bathroom, but rather fully integrated into it. To achieve this, go for a transparent shower enclosure. These elements, as stylish as they are simple, remove the sensation of barriers and give a feeling of openness and space, no matter the size of your bathroom. Both Victoria walk-in and Naray come standard with the Maxiclean® treatment, an invisible protective coating which inhibits the build-up of lime and water spots.

#### Victoria

Not all bathroom spaces are the same, which can make fitting in a shower that offers functionality and comfort, a challenge. Victoria Shower Enclosures are designed with a number of forms and configurations, including 1 or 2 sliding doors, lateral or quadrant forms, which allow for the unique rounded shower door, swinging doors and fixed panels for easier installation. Victoria Shower Enclosures can transform any space, whether large or small, and create an ideal shower environment for better enjoyment.

#### Naray

Roca's Naray collection is a reliable range of shower enclosures whose sliding doors are opened via an easy-to-grip polished silver or matt black handle. Order exactly the size you need, with an edgeless or a brushed matt black profile to give a stylish sense of definition.

A good shower is at the very heart of any wellness routine. It remains one of the few moments of true disconnection, where phones are forbidden and worries are left outside. You deserve your dream shower – and whatever your preferences in the shower space, Roca has everything you need to make that dream a reality.

---

# Why Everyone Needs an Accessible Bathroom

TEXT BY PATRICIO MARTINEZ AND MAXIMIÀ TORRUELLA.  
PMMT ARQUITECTURA. BARCELONA

At some point, each of us may find ourselves unable to fully access the space around us. It might be through injury, or might not; it may be long-lasting or short in duration. It may come early in life, or later.

Access wall-hung Stonex® basin with integrated towel rails

Access wall-hung Stonex® basin with integrated shelves and towel rails

Access Roca Rimless® wall-hung WC

Access foldable shower seat

When we speak about disability and accessibility, most of us think in terms of wheelchair users or the visually impaired. But there are millions more whom, without having any kind of recognised disability, find their daily lives affected by some sort of temporary or permanent limitation in the use of their surroundings. Children, pregnant women, people with obesity or the older population all frequently find themselves affected by a clash between the built environment and their needs. But it is not the individual who has the disability – it is the environment that creates it.

However, as anyone who lived through the years of suitcases without wheels knows, product designs can and do change, and in many cases all it takes is the simplest of alterations to make an

everyday product more usable forever after. Sometimes a minor adaptation in the shape, material, colour, dimension or operation of a product can make it vastly more accessible to users who might have otherwise not been able to use it comfortably, or at all. This is especially true in the bathroom, where personal autonomy is crucial. It takes a conscientious selection of bathroom elements to create a space with true Universal Accessibility.

Basins benefit in terms of accessibility through the implementation of a safety overflow and shelf for stability. And while users with vision or handling difficulties might have trouble using certain faucets with accuracy, a single-lever faucet, or one which operates via a touchless electronic motion sensor, can overcome these obstacles simply through design.

At any given time in our lives, we will all find ourselves affected by some kind of limitation in the use of the built environment.

Shower trays and baths with anti-slip properties (such as Roca's Stonex® and Surfex®) also rank high in accessibility: they are suitable for young children and the elderly, the user groups most at risk of accidents in these spaces. Roca's thermostatic shower mixers score highly here as well, as they can help avoid burns and scalding with the 38°C limit, after which point the temperature has to specifically be instructed to increase any further.

Toilets can be made more accessible by raising the height, to aid users who may have difficulties standing up and sitting down. Lightweight, soft-closing seats, or seats that automatically raise and lower, such as those that come standard with smart toilets, contribute further to ease of use.

## About PMMT

PMMT Arquitectura, founded by architects Patricio Martínez and Maximia Torruella, is an architecture company specialized in advanced healthcare architecture with high efficiency, health and universal accessibility standards. Their work has been recognised through multiple national and international awards and mentions. What sets the organization apart is its firm commitment to innovation with a long-term vision.

Their strong belief in a universal design that includes everyone was the basis for their creation of Clear Code Architecture®, a parametric methodology to assess the Universal Accessibility of any built environment.

Even colour can play a part. Elements that contrast against their surroundings score more highly, because they're easier for users with limited vision to distinguish. A black profile along a shower enclosure, for example, can help define it for individuals with low vision; likewise, a white operating plate for toilets is ideal for a dark-coloured wall or vice-versa. And in terms of materials, special attention should be given to individuals with hypersensitivity; Vitreous china, stainless steel, ABS, Stonex® and Surfex® are good options in this case.

We understand accessibility as a synonym of personal autonomy in all areas of life. It is crucial to make sure all our daily routines can be carried out in inclusive environments – to guarantee a continuous accessible space for all,

both in private and public. From the time we leave home to the time we return we must ensure not only that users can reach a given space, but that, once there, they can fully use all the elements. Our streets, buildings and interiors should be conceived under the principles of Design for All.

Bathrooms and toilet spaces are a fundamental piece within this sequence, a link in the chain without which it is impossible to speak of Universal Accessibility.

As a society we have a long way to go towards making our environments more accessible – but with each architect keeping accessibility in mind when planning spaces and each designer working towards accessible products to fill them, we're getting closer all the time.

## Clear Code Architecture

Clear Code Architecture® is the first method that objectively guarantees spaces for everyone. It is the result of research through which PMMT Forward Thinking Healthcare Architecture studies the needs of any limitation in the use of built space. To do so, they define thirteen groups that gather all the needs that any person can experience in any space, creating a parametric method that allows to objectively evaluate the level of universal accessibility of an environment and help to improve it.

### Access

A full range of universal design solutions aimed at users with reduced mobility.

# “Not Destroy, but Renew”

Magda Federowicz-Boule is the owner and President of Tremend, an architecture studio based in Warsaw, Poland, which specializes in architecture, interior design and sanitary and electrical installation. They are known for their green building projects which integrate natural and recycled elements. We spoke to Magda about the AC Marriott hotel in Kraków, for which Tremend did the interior design, working closely with Roca.

**R:** What if the materials are not available?

**MFB:** If we have to use other materials, we try to use recycled materials, we check the sources of those materials, and we make sure that the contractors we use are on the same page. Also, we try to be very local. This is more eco-friendly and ends up being more cost efficient in the end as well. We try to tell a local story, produce something that speaks to the community.

---

## Roca Chats with Magda Federowicz-Boule of Tremend Architects, Designer of the AC Marriott Hotel, Kraków, Poland

**Roca:** Tell us a bit about your studio.

**Magda Federowicz-Boule:** We work in several different fields: hotels, industrial spaces, and others. But whatever the case may be, we try to make them zero consumption.

**R:** How so?

**MFB:** When we do a renovation or adapt a project, we try not to construct new materials. We always try to renew what we have. The first questions we ask ourselves are: what can we keep? What can we adapt? What can we reuse? Not destroy, but renew. This is the first step.

**R:** What are the key things to keep in mind as far as saving energy?

**MFB:** How can we reuse, recycle? We did a coworking in Katowice where the users could generate energy using bicycles, for example. You have to be creative. We also try to look at the surrounding space. How can we use the natural features of the land to gain warmth during the winter and stay cool during the summer? Even the way you orient the space to the light can be important.

**R:** How did you apply these principles to the Marriott project?

**MFB:** The AC Marriott we did in Kraków from an existing building. Originally it was constructed as apartments, but still we had to adapt it. For modifications we tried to use green materials, recycled materials. The result was not only more eco-friendly, but I think also more

beautiful. We also included a lot of greenery – plants and so forth, although that’s something different than green design.

**R:** How was your experience working with Roca?

**MFB:** We’ve done a lot of projects with Roca, not just Marriott. They’re always a good corporation to work with. They share our concerns about ecology and green design, although in their case it’s applied more to bathrooms, of course. They’ve designed water-saving technologies, and things of that nature.

**R:** Who chose the bathroom fixtures in the case of the Marriott?

**MFB:** We did – we usually choose pretty much everything. Each country will have its own unique tastes as far as bathroom fixtures goes, but in the end the functions and ideas are the same everywhere.

**R:** How do you feel about how the project turned out?

**MFB:** The AC Marriott is a very special project. It was a challenge, but I love how it turned out – very elegant, lots of nature-inspired designs, contributions by local artists, made with local materials and matching a local design sense. It was a great collaboration.

## Ruy Ohtake

Born in Brazil, the son of Japanese-Brazilian Tomie Ohtake, one of Brazil's leading artists, Ohtake grew up in a highly cultured environment, exposed to the world of art and design. He studied Architecture in São Paulo, under João Vilanova Artigas, worked with Oscar Niemeyer, and then went on to establish his own practice, designing over 400 buildings throughout his long career, many of them in his hometown, the city of São Paulo.

Among his career highlights are the house/studio designed for his mother, in the early days of his office, and the half-circle shaped Hotel Unique, considered by many an icon of the Brazilian boom of the 2000's and his years long collaboration with the community of the Heliópolis favela.

A multi-faceted designer, Ohtake was also known for his product designs, bringing his originality and whimsical creations to one of furniture pieces, commercial collections, table-top items, and rugs creations.

An enthusiastic speaker, he was a well sought-after lecturer, travelling both domestically and abroad for speaking engagements. He was the recipient of many national and international awards and honors, including the "Best of the Best" Red Dot Design Award in 2019 for his design for Roca's Ruy Ohtake Collection. He passed away in November 2021, at the age of 83 and since then his office is led by his son, architect and designer Rodrigo Ohtake.

# Everlux

A highly durable finish which adds a touch of elegance to faucets and shower accessories.

**Sophisticated Finish**  
Everlux provides an exclusive and stylish finish that adds distinction and singularity to any bathroom space.

**Resistant**  
Its ultrafine coating is made of highly durable metals, resulting in a surface extremely resistant to cleaning products, dings and scratches.

**Sustainable**  
Made through a unique production process which does not use or generate harmful chemicals.

# Smart Shower

**Intuitive use**  
Its capacitive technology and the ergonomic design of its rotating controls make the Smart Shower very user-friendly. Moreover, as its buttons light up when touched, its use is very intuitive, even for children or the elderly.

**Self-cleaning**  
The Smart Shower has a cleaning program that activates all water outlets, releasing an intermittent high-pressure flow of water to remove lime and impurities, which build up in pipes and jets.

**Ultrafine design**  
The control panel barely sticks out from the wall thanks to its 12 mm thick profile.

Smart Shower Digital Shower

2-way Smart Shower Pack

3-way Smart Shower Pack

**2-way Smart Shower Pack includes:**

Smart Shower, 300 x 300 RainDream shower-head, 400 wall arm, Stella Stick Square hand-shower, satin PVC flexible hose and bracket for hand-shower with integrated water inlet.

**3-way Smart Shower Pack includes:**

Smart Shower, 350 x 350 RainDream built-in shower-head, 3 Puzzle jets, Stella Stick Square hand-shower, satin PVC flexible hose and bracket for handshower with integrated water inlet.

# Roca's Commitment to a Sustainable Future

---

To make our economy fully sustainable is the great challenge of our generation. The pressure on our natural resources, coupled with the undeniable reality of climate change, requires each of us to rethink the ways we consume, move and behave. Roca's mission is to improve the daily lives of our customers today while at the same time making sure we leave a better world for the next generations.

Our commitment to sustainability starts from the very beginning, at the level of design. We implement sustainability in the very concept of our products, from toilets that use fewer litres of water per flush to faucets that avoid unnecessary use of the boiler. We've implemented

more sustainable solutions in our production processes, and get them to market using less fossil fuels and with smarter packaging.

But we want to go further. Looking forward, we are working to meet our goal of carbon neutrality by 2045 and we've also committed to the Science Based Targets initiative (SBTi), a volunteer programme by which companies define a clear path to reduce emissions in line with the Paris Agreement goals. The company's roadmap is also aligned with the Ten Principles of the United Nations Global Compact and the Sustainable Development Goals (SDGs) of the 2030 Agenda.

"Established in 1917, we remain a family-owned business to this day," notes Carlos Velazquez, Roca Group's Sustainability Director. "With this comes a deep sense of responsibility to ensure future generations are provided for." As a global leader in the manufacture of products for the home, we recognise that our actions set an example for the industry as a whole. Through our actions we hope to inspire others to make responsible choices. We are in the unique position of being able to contribute to water and energy savings in millions of homes worldwide. Each day, we're taking another step on our journey of more than 100 years of responsible growth.

## Anupama Kundoo Co-Creation: Architecture is Collaboration

“As passionate as I am about my work, my work is not about me,” writes architect Anupama Kundoo, who presented a series of projects at Roca Gallery Barcelona from May-September 2022. The exhibition, *Co-Creation: Architecture is Collaboration*, is part of Roca’s ongoing support of innovative designers and creatives and its engagement with sustainability and social development.

For the exhibition, Kundoo, whose socially engaged work is deeply connected with research and collaboration, invited various colleagues and professionals, such as NGOs, craftsmen, architects and academics, to work with her on different projects. The results included interior products, construction technologies and large-scale urban projects and it highlighted Kundoo’s ongoing investigation into critical topics from materials, to energy efficiency to the circular economy.

Kundoo has an unwavering generosity in her practice, and *Co-Creation: Architecture is Collaboration*, offered visitors the opportunity to see how process, research and collaboration can help us understand the power of thoughtful design and be inspired by its potential in making a better world.

---

# About Roca

Operating 76 production facilities  
across five continents, employing  
over 21,000 people and serving  
over 170 markets

---

## We make people live the best bathroom experience.

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings in Barcelona in 1917, we have grown into a global benchmark in sanitaryware. Roca is now one of the largest producers of bathroom products on the planet.

Our designs are intuitive and intentional. Our philosophy is one of perpetual improvement, and we constantly seek to improve our product experience. Drawing on the knowledge and expertise of our global network, as well as over 100 years of experience in the sector, we develop innovative solutions that refine your bathroom while bringing comfort and simplicity to your daily routine.

Design is ingrained in everything we do. Our team of experts, often through collaborations with some of the world's leading designers, consistently create products and collections that drive innovation in the sector. These teams, along with our cutting-edge facilities, manufacturing prowess and exceptional production capacity, have allowed us to maintain our position of global leadership for more than a century.

Even while achieving a presence in over 170 markets across the world, we have remained close to our roots. From the beginning, we have been active participants in Barcelona's design culture, where forward-thinking ideas and vernacular styles go hand-in-hand to create natural, intuitive solutions that enhance daily living. We will continue both to draw from and contribute to this community.

We recognise that our position of global leadership comes with responsibility. We seek to set the standard in sustainability at every step of the manufacturing process: from the acquisition of materials, through to production, logistics, packing and shipping. We design our products with sustainability and efficiency in mind, from toilets that minimise water consumption to furniture made with wood sourced from responsibly-managed forests.

We also carry out projects that help address some of the most pressing global challenges of our time. To this end, our foundation We Are Water works to promote a culture of sustainable, responsible water management, and to provide safe,

reliable access to clean water in some of the most disadvantaged communities across the globe.

Our commitment to the planet extends into the social field. We are serious about our responsibility towards our employees and the communities we serve. Our aim of improving people's lives both within and outside the company has led us to promote initiatives that foster talent and improve the customer experience. We organise design competitions, such as the [jumpthegap®](#) and the One Day Design Challenge, which provide opportunities for emerging designers to showcase their creativity and expand their professional networks. And through our six international Roca Galleries, and web platform [rocagallery.com](#), we host events, talks and articles which foster dialogue around some of the planet's most important issues.

We celebrate the small, daily moments of domestic happiness. The bathroom is an intimate space of self-care which can enhance users' daily lives. At the heart of our business is the desire to develop attractive and functional solutions that contribute to improved wellbeing and better standards of living.
