always the best climate

ZEHNDER STUDIO COLLECTION

ALWAYS THE BEST CLIMATE

"We strive to improve the quality of life by providing the finest indoor climate solutions."

Excellent team

Every day we combine passion, expert knowledge and commitment to give you the best results.

Great solutions, products and services

Great products and unique service for an energy-efficient, healthy and comfortable indoor climate.

WE ARE THE SPECIALISTS FOR A HEALTHY, COMFORTABLE AND ENERGY-EFFICIENT

The broad and clearly structured portfolio from the Zehnder Group is split into five product lines. Consequently, we can provide our customers with the right product, perfect system and matching service for all types of projects – from new build to renovations, single or multi-occupancy homes, as well as commercial projects. This variety ensures that our wealth of experience is continuously expanding, providing tangible added value to our customers on a daily basis.

Comfortable indoor ventilation

Our comfortable indoor ventilation is energy-efficient and provides a healthy indoor climate. It promotes the wellbeing of the occupants and increases the value of the property.

OUR BRAND REPRESENTS INNOVATION, QUALITY AND DESIGN

The Zehnder brand offers excellent indoor climate solutions within the product lines of decorative radiators, comfortable indoor ventilation, heating and cooling ceiling and clean air solutions.

First choice for customers

Always close to the needs of our customers, to grow with you and overcome all challenges together.

INNOVATION OVER 5 GENERATIONS

MANUFACTURER OF THE WORLD'S

STEEL AND BATHROOM **RADIATORS**

REPRESENTED IN MORE THAN

AROUND 3,500

AND DESIGN RIGHTS THROUGHOUT THE WORLD

INDOOR CLIMATE

Decorative radiators

Our individual decorative radiators make every room - wether at home or in commercial or public buildings not only warmer, but also more attractive. They combine iconic design with outstanding comfort experience.

Heating and cooling ceiling

The ceiling is the perfect place to supply a room with convenient heating and cooling. Energy-efficient climate via radiant panels work perfectly with our suite of solutions from office to manufacturing spaces.

Clean air solutions

Air cleaning systems from Zehnder effectively reduce the amount of dust and other particles in the air. The result: clean working environments, significantly improved employee health and enhanced business performance.

BEST QUALITY CERTIFICATES

Zehnder Group products are frequently awarded prizes for design and innovative technology.

Zehnder World of Colours

Unique color worlds for bathrooms and living rooms

From our choice of clothing to our living environment. Colours allow customers to create their ideal individual style & space. Zehnder has recognised and responded to these new expectations and demands. The new Zehnder colour system gives your customers every option to perfectly coordinate the colour of their radiators with the latest interior design trends, seamlessly integrating them into any environment. From our choice of clothing to our living environment. Colours allow customers to create their ideal individual style & space.

Zehnder has recognised and responded to these new expectations and demands. The new Zehnder colour system gives your customers every option to perfectly coordinate the colour of their radiators with the latest interior design trends, seamlessly integrating them into any environment. The future of colours and aligning with today and tomorrow's trends is important to Zehnder, that's why the expertise of renowned colour trend experts was drawn on during the concept development. Long-term trends in six areas: architecture, interior design, bathrooms, living spaces, surfaces and materials were analysed and integrated into the concept, culminating in a future-oriented colour palette. Five modern Zehnder colour worlds were derived from these colour and living trends to ensure that the system always remains up to date and that the balance between fashions and long-term trends is maintained.

The Sanctuary

The home as a place of rest, relaxation and retreat

The home is a place of relaxation and tranquillity. Rough surfaces, brushed finishes, mixed glazes and natural materials create sanctuaries. Natural off-white, light brown and grey tones are the key to a cosy environment to relax in. Brushed metals such as brass mixed with wood create a modern contrast. Round shapes and soft textures soften any feeling of austerity.

The Mystical Home

A private place for personal rituals and wellness

Rough, natural surfaces contrast with refined designs. Rough concrete textures mixed with polished stone surfaces create a multi-sensory experience. Black and dark grey shades, graphite and taupe are the key to a mystical home. The monochrome rooms are accentuated by dark blue tones and brushed metal.

The muted colour palette is made for a tranquil space for personal rituals and wellness.

Neo Green

Reflections on our desire for a natural environment

Green tones create a balance with our desire for more nature in our lives. Walls and floors, but also textiles and décor appear in shades of green. Soft, delicate mint or petrol-coloured graphite reflect our desire for a natural environment. Nude, light brown and grey tones create harmony and calm.

Mother Earth

Terracotta as a symbol for a warm and earthy look

Terracotta helps create an earthy and warm look, both as a material and as a colour. The highly pigmented quality of terracotta and the deeply saturated yet sun-faded solid colours create a natural and sophisticated look. Shades of cotton white, ochre, brick red and brown are combined to create an earthy colour palette. Terracotta is symbolic of the earth we live on and our strong desire to protect it.

Mono Material Concrete

The continuity of space – rough, seamless, expressive

metal are perfectly combined.

The use of a single material creates a seamless, uniform look and a quiet space – free of visual noise. Raw concrete flows from the interior to the exterior, giving continuity to the space.

Eccentric orange and natural brown tones create a modern contrast. Home accessories in brushed

WHEN FORM FOLLOWS FUNCTION

The new Zehnder Studio Collection stands for the highest quality of Zehnder, paired with uniqueness, attention to detail and exclusivity. With the slogan "when form follows function", Zehnder sums up the essence of the new product range: form follows function. The Zehnder portfolio is thus enriched with products for which innovative designs and technologies play a central role as well as harmoniously combined.

The Zehnder Studio Collection embodies products with unique, individual, exclusive and functional design, in which the **heritage of the RUNTAL brand lives on**. Get to know our new product world of the Zehnder Studio Collection!

STUDIO COLLECTION ZEHNDER ALBAN

A design concept made for purists – precise lines, flat sides and right angles. The angular radiator with a practical side – slide on and hang up towels effortlessly with just one hand. Connected directly to the central heating system, this decorative radiator keeps the bathroom warm and comfortable. Zehnder Alban from the Studio Collection: the design version made of handpolished, high-quality stainless steel. Simple, elegant design – and warm towels whenever you need them.

Operation on central heating system

The Zehnder Alban decorative radiator from the Studio Collection is a designer piece made of hand-polished, high-quality stainless steel with horizontally arranged square pipes and vertical header tubes. Bath towels can be effortlessly inserted at the side and hung up with just one hand. Square tubes 50 x 30 mm, header tubes 30 x 30 mm. Thermal outputs to EN 442, with CE marking.

 $4\ x\ \ 1/2$ " female thread on the ends of the header tubes. Option to choose installation as right-hand or left-hand version (flow/return at the bottom with left or right options), distance 50 mm; $2\ x\ 1/2$ " directional air vent at top, screwed in at the factory for installation as right-hand version. Delivered ready to install with elegant wall brackets in chrome.

Operating pressure max. 5.2 bar
Operating temperature max. 90 °C

Pure and simple. This decorative radiator celebrates the perfection of material and finish, combining state-of-the-art heating technology with striking contemporary design. The smooth surfaces efficiently give out a pleasing warmth whilst subtly integrating the radiator into the room. Alternatively, it can be transformed into a feature in its own right with the wide selection of materials and finishes. The only limit is your imagination. Zehnder Arteplano from the Studio Collection. The art of making a statement.

Radiator surface: Stainless steel, mirror polished

Operation on central heating system

Zehnder Arteplano from the Studio Collection is impressive with its smooth surface, creating a cosy warmth in no time with its exceptional responsiveness. With such a wide range of materials and finishes to choose from, the decorative radiator integrates harmoniously into any room.

Flat front, thermo-lacquered steel as standard. With optional towel rail for retrofitting at any height. Several towel rails possible for each radiator. Side covers permanently welded to the radiator and not removable (model VZA and VZLA included in standard scope of delivery). Thermal output to EN 442, with CE marking. With the factory standard connections with 4 x ½" female thread, the following connection types are possible. ½" flow/return at bottom vertical opposite end, installed with left, right or centre option 50 mm, with ½" directional air vent at top right.

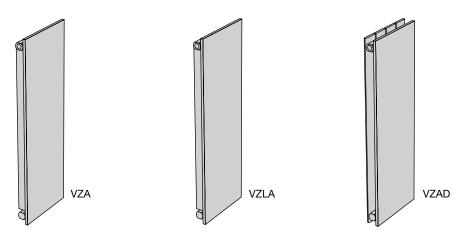

Radiator with powder coating, in colour RAL 9016 as standard, in special colour or surface. Delivered ready to install with wall brackets.

Standard scope of delivery for operation on central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow, return at bottom, vertical opposite end, left, right or centre option 50 mm
- 1 x ½" vent, top right
- Wall brackets in radiator colour:
 - VZA and VZLA model: CVD1, Modell VZAD: CVD0
- Packaging

STUDIO COLLECTION ZEHNDER CHIME

The athlete of the radiator world – powerful, self-assured design consisting of elegantly curved round tubes whose open side allows even very thick towels to be slid on as a convenient way of warming them. Zehnder Chime from the Studio Collection: the round design version made of hand-polished, high-quality stainless steel can be installed with the open end on the left or right. Zehnder Chime makes a bold statement in the bathroom – and has the added bonus of providing beautifully pre-warmed towels.

STUDIO COLLECTION ZEHNDER CHIME

Operation on central heating system

Zehnder Chime from the Studio Collection: the round design version made of hand-polished, high-quality stainless steel can be installed with the open end on the left or right. Powerful, self-assured design consisting of elegantly curved round tubes whose open side allows even very thick towels to be slid on as a convenient way of warming them.

Horizontal tubes each branch asymmetrically from the laterally arranged manifolds. Round tube Ø 51 mm, header tube 30 x 30 mm. Thermal output tested to EN 442, with CE marking. 4 x 1/2" female thread on the header tubes, connection size 50 mm. Flow, return at bottom, left-hand or right-hand installation option; top 2 x 1/2" directional air vent, screwed in at the factory for installation as right-hand version. Delivered ready to install with elegant wall brackets in chrome.

Operating pressure max. 5.2 bar
Operating temperature max. 90 °C
Heightmm
Lengthmm
Modelmm

Advantages

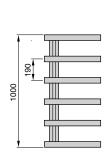

- Hand-polished stainless steel
- Ideal for hanging towels due to large tube spacing and asymmetrical tube arrangement
- Can be installed as a right-handed or left-handed version
- Easy to clean

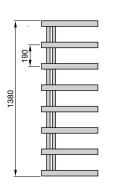

Standard scope of delivery for operation on central heating system

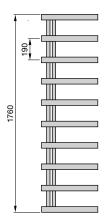

- Hand-polished stainless steel
- 4 x ½" connections for flow, return, vent
- 2 x directional air vent ½" screwed in at the factory for installation as right-hand version
- Elegant wall brackets in chrome
- Packaging

STUDIO COLLECTION ZEHNDER DESEO VERSO

The Zehnder Deseo Verso electric glass radiator from the Studio Collection combines a modern design with exceptional comfort and outstanding functionality. The elegant black, white or even reflective heated glass front makes this decorative radiator an eye-catching feature that fits perfectly into all kinds of bathroom designs. Additional special features for users: One or two extendable towel rails, depending on the model, which can be mounted on the back of the radiator. This allows the towels to 'disappear' behind the glass front and keeps the bathroom looking neat and tidy. Every detail perfectly thought out.

STUDIO COLLECTION ZEHNDER DESEO VERSO

Zehnder Deseo Verso decorative radiator, electric-only, made of safety glass - double-hardened (class B in accordance with EN 12600), includes one or two polished stainless steel towel rails (depending on model) for mounting on the back of the radiator at the specified height with extension to the right or left (can be selected for each towel rail when installing).

Operation of the heated glass front via simple control panel (modes: Surface temperature 45 °C, 55 °C, 65 °C, 2 h timer function, off), with keylock option, or using separate model 4 battery-powered infrared remote control model 4 with room temperature control (modes: frost protection, economy, comfort, individual daily or weekly programme, off).

Heated glass front available in black, white or as a mirror. Connection cable 1,8 m long with two pin plug, simple cable routing adjusted to the towel rail installation via cable clips preinstalled on the back of the decorative radiator ex works. Nominal voltage 230 volts, splash-proof IP 45.

Output W Height Length mm Model

Heated glass front: White

Advantages

- Minimalist, modern design that adds an elegant touch to the
- Practical: extendable towel rail on the back of the radiator ensures a tidy bathroom
- Heated glass front provides pleasant warmth in next to no time
- Convenient operation via control panel or remote control
- Supplied mounting template ensures easy installation Low energy consumption in stand-by mode (≤ 0.5 W)
- Energy-efficient and comfortable heating via innovative open window detection
- Ready-to-plug

Standard scope of delivery for electric operation

- Radiator made from safety glass with control box and cable clips pre-installed on the back
- Polished stainless steel towel rails for mounting on the back of the radiator, extension either to left or right (as selected during installation); for 1500 mm height: one towel rail; for 1750 mm height: two towel rails per radiator, with fixing material
- Infrared remote control model 4 including batteries (AAA) with selectable modes: manual (above room temperature), weekly programme, timer, frost protection, off
- Wall mounting accessories and cable clips in the colour of the radiator, or for mirror radiators: Wall bracket + cable clips in
- Wall spacer for adjustment to the correct wall clearance
- Packaging and drilling template

STUDIO COLLECTION ZEHNDER FOLIO BELT

With an impressive flat surface, full closed edging and gently tapered silhouette, Zehnder Folio Belt from the Studio Collection is highly appealing with its unusually light and floating appearance. The design of this radiator, which has a projection of only 16 millimetres depth, has only been made possible by the development of innovative design elements and materials. The striking flat shape of Zehnder Folio Belt is a result of innovative heating technology. The material and colour can be selected to make the radiator blend harmoniously into your interior design concept or else create a pleasing contrast. Painted surfaces or anodised aluminium allow the heat to flow elegantly and efficiently into the room, and with one or two towel rails, it also offers maximum style and comfort in the bathroom.

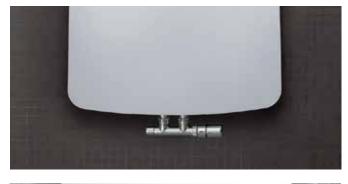

STUDIO COLLECTION ZEHNDER FOLIO BELT

Radiator surface: anodised aluminium

Radiator surface: anodised aluminium / white matt

Operation on central heating system

The impressive Zehnder Folio Belt from the Studio Collection features an unusually light and floating appearance. The design of this radiator, which has a projection of only 16 millimetres depth, has only been made possible by the development of innovative design elements and materials.

Heating register made of copper pipe \varnothing 12 mm, embedded in an aluminium honeycomb construction, which is enclosed by expanded natural graphite, 45° inclined edges made of polyamide. One or two (depending on model, according to overview of models) chromeplated towel rails 40 x 4 mm, for installation at a fixed predefined position, included in scope of delivery.

Thermal output to EN 442, with CE marking. With two connections $\frac{1}{2}$ " female thread for flow/return at the bottom centre, distance of 50 mm, decorative directional air vent $\frac{1}{2}$ " at the top rear.

Front and back made of aluminium available in all colours according to the Zehnder colour chart as well as in the specified surfaces, back with anodised aluminium finish in matt black. Delivered ready to install with elegantly shaped wall brackets in radiator colour (anodised aluminium surface: wall brackets in matt black).

Operating pressure max. 10.0 bar
Operating temperature max. 80 °C
Heightmm
Lengthmm
Modelmm

Construction

At the core of this decorative radiator is a heating register made of copper (1), embedded in an aluminium honeycomb construction (2), which is surrounded by expanded natural graphite (3).

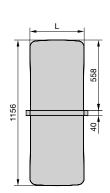

Thanks to this special, newly developed design and an innovative manufacturing technique, Zehnder was able to develop this very thin and ultra-light radiator without compromising on performance. The natural graphite used is an innovative material with ideal properties such as high thermal conductivity, low density and resistance to ageing.

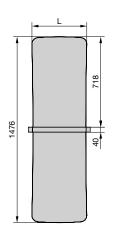

Advantages

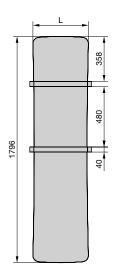

- Innovative heating technology
- Sleek, elegant design
- Smooth surface makes for easy cleaning
- Convenient for hanging up towels

STUDIO COLLECTION ZEHNDER FOLIO GLASS

Whether it's black, white or even in the form of a mirror, Zehnder Folio Glass from the Studio Collection integrates itself harmoniously into its interior environment with its elegant glass finish. With an extremely flat body of only 8 mm, fully closed edges and a gently tapering silhouette, the Zehnder Folio Glass appeals with its unusually light appearance. The design of the glass surface floating in the room is the result of innovative technology. Controlled either by remote control or directly on the surface, it delivers maximum style and comfort. Zehnder Folio Glass – crystal-clear design for your home.

STUDIO COLLECTION ZEHNDER FOLIO GLASS

Radiator surface: White gloss

Electric operation

Whether it's black, white or even in the form of a mirror, Zehnder Folio Glass from the Studio Collection integrates itself harmoniously into its interior environment with its elegant glass finish. With an extremely flat body of only 10 mm in depth, fully closed edges and a gently tapering silhouette, the Zehnder Folio Glass appeals with its unusually light appearance.

The design of the glass surface floating in the room is the result of innovative technology. Glass finish made of laminated safety glass of 2 x 4 mm, with an integrated electrically operated heating film. One or two chrome-plated towel rails can be ordered separately. For retrofitting at a fixed predefined position. Operation via control element (control panel) or chronosonda. Splash-proof IP44, mains power supply 230 V. Connection cable 1.2 m in length with two pin plug.

White cable and plug, cable outlet downwards. Front available in black gloss, white gloss, mirror. Delivered ready to install with elegant wall brackets in black.

STUDIO COLLECTION ZEHNDER FOLIO HYBRID

With an impressive flat surface, full closed edging and gently tapered silhouette, Zehnder Folio Hybrid from the Studio Collection is highly appealing with its unusually light and floating appearance. The design of this radiator, which has a projection of only 16 millimetres deep, has only been made possible by the development of innovative design elements and materials. The combination of a glossy and a matt surface allows the technology behind it to shine through: an electrically operated infrared heating element made of glass is located in the middle of the radiator, the rapid reaction time of which enables drying or warming of towels in the shortest time possible. The surrounding radiator is connected to the central heating system and provides cosy warmth in the room. With up to two chrome-plated towel rails, Zehnder Folio Hybrid also lends maximum style and comfort to the bathroom. Zehnder Folio Hybrid – the best of two heating philosophies.

Zehnder Zenia from the Studio Collection is an electric towel warmer, towel dryer, infrared radiator and boost heater all-in-one — in the form of an integrated unit that perfectly blends into modern bathroom architecture thanks to its minimalist design. The revolutionary Zehnder Zenia thermal comfort unit supplies pleasant heat quickly and ensures ultimate comfort heating in your bathroom independently of the central heating system. At the same time, you can dry and warm towels behind a visually appealing heated glass door. Available in white and black.

Heated glass front: White

Electric operation

Zehnder Zenia thermal comfort unit for rapidly heating and drying textiles, for operation in combination with a room heating system that covers the basic heat requirements. Zehnder Zenia comprises a housing for pre-assembly and thermal comfort unit for final assembly. Option to select from either a rectangular frame or outer case as the housing for pre-assembly. Rectangular frame made of galvanised sheet steel for mounting the thermal comfort unit as an in-wall installation (in-wall systems, vertical frames or solid constructions) or for on-site integration into furniture. Aluminium decorative grille, painted, for mounting the thermal comfort unit as an on-wall installation.

Thermal comfort unit includes an inner case and an infrared heated glass front with the option to have the hinge on the left or right. Plastic inner case with integrated boost heater and glass cover with control panel and Bluetooth module. Heated glass door with internal towel rail for warming and drying textiles. Towel rail offers space for two towels of max. 140 x 70 cm each. Thermal comfort unit can either be operated via a simple control panel or an individually configurable app (available for both iOS and Android operating systems). Option of individual or combined operation of heated glass door (heated front face) and boost heater (functions: Boost function, towel warming or fast drying options, each with their own pre-set running time that can be modified via the app).

Thermal comfort unit with glass cover and infrared heated glass front available in black or white. Mains power supply for boost heater and heated glass door via common connection cable and mains power supply plug for connecting to on-site electrical connection box in the wall for a nominal voltage of 230 volts, total nominal output of 1225 W, splash-proof to IP 44 standards, complete with CE marking in accordance with DIN EN 60335 (Household and similar electrical appliances—Safety), suitable for optional connection in accordance with protection class I or II (DIN EN 61140), hinges certified in accordance with VDI 6036 (requirements class 2), heated glass door made of safety glass—double-hardened (class B1 in accordance with EN 12600), system requirements for operation via app: iOS version 9.0 onwards, Android version 4.3 and 5.x onwards, Bluetooth from BLE onwards—Bluetooth 4.0 Low Energy.

Housing for pre-assembly model
Thermal comfort unit for final assembly model

Advantages

- Hidden storage space ensures a tidy bathroom
- Heat readily available on demand for pre-heating rooms and towels with the integrated boost heater
- Radiant heat from the heated glass door creates a feeling of cosiness
- The intelligent drying function significantly reduces the build-up of bacteria on damp towels and textiles
- User-friendly operation with individual configuration options via an intuitive control panel or the app
- Smooth surfaces make for easy cleaning
- Low energy consumption of ≤ 0.5 W in stand-by mode for increased energy efficiency

Standard scope of delivery for rectangular frame

- 4-part rectangular frame made of galvanised sheet steel complete with slots for mounting in an in-wall system
- 2 galvanised mounting brackets for mounting and aligning the rectangular frame to surrounding components
- Mains power supply socket for connecting to on-site electrical connection box
- Mounting accessories
- Cardboard cover for protection
- Packaging

Standard scope of delivery for outer case

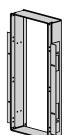

- Single-piece, aluminium outer case, surface painted in white aluminium, complete with fixings on the back for mounting on prefabricated walls
- Mains power supply socket for connecting to on-site electrical connection box
- Mounting accessories
- Packaging

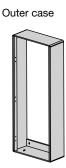

Thermal comfort unit for final assembly
Hinge on left
Hinge on right

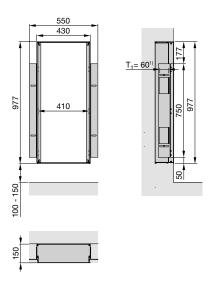

Housing for pre-assembly Rectangular frame

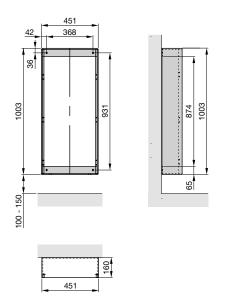

Rectangular frame (required for in-wall installation or integration into bathroom furniture, etc.):

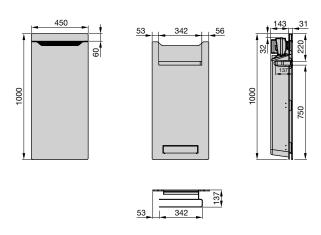

1) T₁ = Depth adjustment of rectangular frame

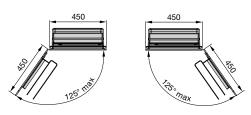

Outer case (required for on-wall installation):

Thermal comfort unit for final assembly:

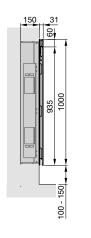

Hinge on left Hinge on right

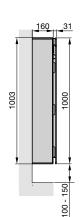

Dimensions in mm

Zehnder Zenia with in-wall installation

Zehnder Zenia with on-wall installation

Installation options: In-wall installation with rectangular frame

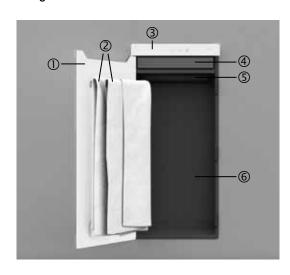

In-furniture installation with rectangular frame

On-wall installation with outer case

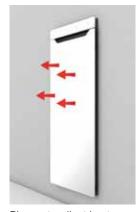

Design of thermal comfort unit:

- ① Heated glass door with soft-close hinge
- 2 Towel rail for hanging a maximum of two large bath towels of 140 x 70 cm
- 3 Glass cover with control panel and Bluetooth module
- Suction area of the integrated boost heater with removable filter housing
- © Outlet area of the integrated boost heater
- © Easy-to-clean, plastic inner case

Functions:

Pleasant radiant heat provided by integrated heated glass door.

Suction of room air beneath the glass cover by the boost heater. Warm, even airflow from above warms and dries textiles quickly.

the heated air via an outlet behind the heated glass door.

Operation:

Even, gentle distribution of Straightforward selection of the four functions on the control panel. The intelligent app control also offers a range of additional functions: Remote control, daily and weekly programmes, options to change the factory settings, and support features (including video instructions for filter replacement and help with fault notifications).

Integration in special burgbad furniture

Radiator surface: Chrome

Operation on hot water central heating system

Zehnder Yucca decorative radiator made from horizontally arranged precision steel tubes and vertical header tubes, without visible welds and fully welded due to capstan welding technology. Sets of 3 horizontal tubes each branch symmetrically, alternately left and right, from the centrally arranged manifolds. Towels can be slid in from the side to warm or dry. Single or double-layer version. Header tubes Ø 30 mm, horizontal tubes Ø 20 mm.

Thermal outputs to EN 442, with CE marking.

4 x ½" connection at the ends of the header tubes for flow, return, electric heating element and venting. Connection size 50 mm, suitable for using a special connection fitting in single or twin-tube operation. Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome on request. Delivered ready to install with matching wall brackets in colour of radiator.

Electric operation

Zehnder Yucca decorative radiator, electric-only, made from horizontally arranged precision steel tubes and vertical header tubes. Sets of 3 horizontal tubes each branch symmetrically, alternately left and right, from the centrally arranged manifolds.

With integrated electric heating element RACY-C in left hand header tube at bottom. Degree of protection IP44 (splash-proof), for mains supply of 230 V. Connection cable (1,2 m) with Euro plug. Decorative radiator filled with heat transfer fluid. Separate, battery-operated remote control device model 2 for controlling the room temperature. Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome on request. Delivered ready to install with matching wall brackets in colour of radiator.

Standard scope of delivery for hot water central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow, return, venting
- 2 x ½" directional air vent
- Mounting accessories in colour of radiator
- Packaging

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- Filled with non-flammable heat-transfer fluid (frost-proof to -10°C)
- With integrated electric heating element RACY-C, with remote control device, incl. battery, with selectable operating modes: manual (above room temperature), weekly programme, timer, off
- Electric heating element cover in colour of radiator
- Mounting accessories in colour of radiator
- Packaging

Operation on hot water central heating system

Zehnder Yucca Asym decorative radiator made from horizontally arranged precision steel tubes and vertical header tubes, without visible welds and fully welded due to capstan welding technology.

Sets of 3 horizontal tubes each branch asymmetrically from the laterally arranged manifolds. Towels can be slid in from the side to warm or dry. Single or double-layer version. Header tubes Ø 30 mm, horizontal tubes Ø 20 mm.

Thermal outputs to EN 442, with CE marking.

 $4 \times \frac{1}{2}$ " connection at the ends of the header tubes for flow, return, electric heating element and venting. Connection size 50 mm for using a connection fitting in single or twin-tube operation.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome on request. Delivered ready to install with matching wall brackets in colour of radiator.

Electric operation

Zehnder Yucca Asym decorative radiator, electric-only, made from horizontally arranged precision steel tubes and vertical header tubes, sets of 3 horizontal tubes each branch asymmetrically from the laterally arranged manifolds. With integrated electric heating element

RACY-C in left hand header tube at bottom. Degree of protection IP44 (splash-proof), for mains supply of 230 V. Connection cable (1,2 m) with Euro plug. Decorative radiator filled with heat transfer fluid. Separate, battery-operated remote control device model 2 for controlling the room temperature.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome on request. Delivered ready to install with matching wall brackets in colour of radiator.

Standard scope of delivery for operation on hot water central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow, return, venting
- 2 x ½" directional air vent
- Mounting accessories in colour of radiator
- Packaging

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- Filled with non-flammable heat-transfer fluid (frost-proof to -10°C)
- With integrated electric heating element RACY-C, with remote control device, incl. battery, with selectable operating modes: manual (above room temperature), weekly programme, timer, off
- Electric heating element cover in colour of radiator
- Mounting accessories in colour of radiator
- Packaging

¹⁾ Models for operation on hot water central heating systems can be installed as right-hand version or left-hand version

²⁾ Brackets with modified wall clearance on request

³⁾ Dual energy operation with room divider installation possible only when T-piece is used (see "Accessories")
4) Flow is possible on both sides of the connection fitting

Zehnder EasyFit - with tegrated valve incl. thermostat

Operation on hot water central heating system

Zehnder Vitalo Bar decorative radiator with smooth aluminium front and back plus copper tube heating register in graphite/aluminium construction.

Surrounding, sealed frame of black polyamide. Includes one or two chrome towel rails, depending on the model. Thermal output to EN 442, with CE marking. With two $\frac{1}{2}$ female thread connections for flow and return, positioned at bottom centre, spacing 50 mm.

Completto version with concealed Zehnder EasyFit connection box with flow/return 2 x %" external thread at the back, centred 50 mm clearance, including pre-adjustable valve AV 9 and adjustment dial and folding mechanism for installation.

Radiator with powder coating, in colour RAL 9016 as standard, or in special colour or with an anodised aluminium surface on request, delivered ready to install with wall brackets and packaging.

Electric operation

Zehnder Vitalo Bar decorative radiator with smooth aluminium front and back plus heating cable in graphite/aluminium construction. Surrounding, sealed frame of black polyamide. Includes one or two chrome towel rails, depending on the model.

With CE marking. Separate battery-operated remote control device model 2, control box RACY-S and no visible control elements on the radiator. Splash-proof for mains power supply of 230 V. Connection cable (1,2 m) with Schuko plug.

Radiator with powder coating, in colour RAL 9016 as standard, or in special colour or with an anodised aluminium surface on request, Delivered ready to install with wall brackets and packaging.

Benefits

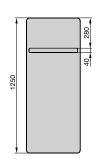

- Innovative technology for efficient heating
- Extremely slim and noticeably light
- High proportion of radiation
- A striking profile for a distinctive look
- Simple accommodation of textiles with towel rail accessible from one side
- Hygienic and simple to clean
- Supports integrated connection due to Zehnder EasyFit

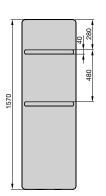

Special benefits for electric operation with RACY-S

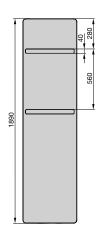

- Fast thermal radiation
- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

²⁾ Towel rail 1 x for H = 1250 mm, 2 x for H = 1570 mm and 1890 mm

Radiator colour: Chrome-plated

Operation on hot water central heating system

The Zehnder Fain gets its lightweight appearance from the narrow heating tubes of just 12 mm, which run into the equally delicate 18 mm manifolds at the sides. Since the valves face inwards, these form part of the continuous vertical outer edge. Two recesses for bath towels make the Zehnder Fain perfectly suited to use in the bathroom.

Zehnder Fain can be connected to the central heating system or is also suitable for electric only operation. Radiator with powder coating, in the colour RAL 9016 as standard, in a special colour or in chrome on request.

Thermal output tested to EN 442, with CE marking. Standard 2 x 1/2" connections with female thread, flow/return on left or right bottom, horizontal facing inwards and 1/4" air vent.

Delivered ready to install with matching wall brackets and assembly kit in packaging.

| Operating pressure | max. 10 bar |
|-----------------------|-------------|
| Operating temperature | max. 110°C |
| Height | mm |
| Length | mm |
| Model | |

Benefits

- Lightweight, modern design that adds an elegant touch to the bathroom
- Inwards facing valves, forming continous vertical outer edge
- Also available as room divider
- Two recesses, ideal for hanging towels

Electric-only operation

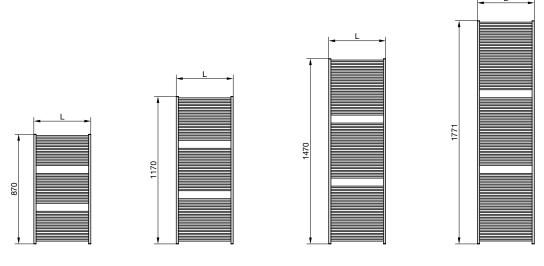

Zehnder Fain sets a modern and stylish accent in the room, combining unmistakable design and high functionality. Space-saving design - for up to 4 towels, which can be warmed at the same time. Round tubes Ø 25 mm made of steel. With built-in heating element, Protection class IP44 (splash-proof), for mains connection 230 volts.

With connecting cable 1,2 m long with contour plug. Cable, plug and cable cap white, for chrome-plated radiators cable and plug grey, cap chrome. Design radiator filled with heat transfer fluid. The heating element has no operating option.

The control must be planned and executed on site.

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- With built-in heating element, protection class IP44 (splash-proof), for mains connection 230 volts. The heating element does not have any control option. The control is to be planned on site
- Connection cable 1.2 m long with Euro plug. Cable, plug and cable cap in white; for chrome-plated radiators, cable and plug in gray, cap in chrome.
- Mounting accessories in colour of radiator
- Packaging
- Fast thermal radiation

Operation on hot water central heating system: Wall mounting

Electric operation:

H = Height

 H_T = Total height, H + 25 mm

L = Length

 L_B = Length of towel rail, L - 50 mm $^{2)}$

V = Flow R = Return K = Bracket

Dimensions in mm

Electric heating Element RE

Characteristics:

Mains voltage: 230 V, 50 Hz +/- 10 % Nominal rating: 350, 650, 900 Watt

Mains connection: 1,2 m power cable with plug

Degree of protection: Class I (IP65)

Functions:

- Thermal limitation integrated
- Once the electric heating element is in operation it switches on/off as per reached temperature of the towel radiator

Electric only version FZA / FZAC

Zehnder Roda Twist Spa Air

Electric operation

Zehnder Roda Twist Spa Air decorative radiator for electric-only operation; made from horizontally arranged precision flat tubes and vertical header tubes, without visible welds, fully welded.

Single-sided, asymmetrically arranged flat tubes 70 x 11 mm branching laterally from the manifold \emptyset 38 mm; radiator can be pivoted 180° from the wall; towels can be slid in from the side to warm or dry.

Dual electrical heating system, comprising electric heating element integrated into the outer manifold and concealed boost heater arranged behind the radiator with flow direction downwards and forwards.

Common mains power supply of 230 V for electric heating element and boost heater, connection cable 1,2 m with Euro plug; splash-proof, IP24, with CE marking; separate battery-operated infrared control device model 3 for controlling the electric heating element and for controlling the boost heater with different operating modes; decorative radiator filled with heat transfer fluid.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with wall brackets incl. cover in colour of radiator.

| Output | Watt |
|--------|------|
| Height | mm |
| Length | mm |
| Model | |

Benefits

- Practical access to the hand towel from the side
- Pivotable by 180°
- Separate or mixed operation of electric heating element and boost heater possible
- Boost function for rapid heating
- Radiant heat and reheating time
- Daily programme, weekly programme can be activated as an option (Eco and Comfort mode)
- Extra hygiene through cleanable air filter
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Ready-to-plug

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- Electric heating element with selectable operating modes: manual (above room temperature) daily programme, off, weekly programme can be activated as an option (Eco and Comfort mode)
- Electric boost heater with timer function, incl. over-heat protection
- Infrared control device model 3 incl. batteries
- Radiator filled with heat transfer fluid
- Mounting accessories for wall mounting with pivot function
- Packaging

Zehnder Charleston Bar

Radiator colour: Traffic White

Zehnder Charleston Bar radiator with towel rail as 2-column or 3-column radiator with vertical precision round tubes and header, fully welded. The individual elements are welded together into finished blocks. Header in sheet steel, round tubes in steel Ø 25 mm. Uses connector technologies with absolutely no melting loss; produced using the LaZer made technique.

Thermal output to EN 442, with CE marking.

The function of the radiator is supplemented by the chrome-plated towel rail for drying and warming towels.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request.

Delivered ready to install with holders and wall brackets in colour of radiator. Connections for flow and return in $\frac{1}{2}$ ", central, spacing 50 mm from bottom to bottom. $\frac{1}{2}$ " venting on the side at the top.

Radiator colour: Traffic White

Benefits

- Residue-free laser welding technology LaZer made
- Classic timeless design
- Towel rail with variable mounting options
- High thermal output
- Central connections, 50 mm
- Matching connection fitting available

Operation on hot water central heating system

Zehnder Metropolitan Spa decorative radiator for use as a bathroom and towel radiator. Flat-looking radiator with recessed slots, made from horizontally arranged flat tubes 70 x 8 mm, which are connected with a surrounding triangular profile frame without visible welded joints. With one or more openings (depending on height) for hanging towels. Thermal output to EN 442, with CE marking. With 4 connections at bottom, 2 x central ½" for flow/return, spacing 50 mm and 2 x ½", outside left and right, with directional air vent.

Connections for Completto version: Flow/return 2 x %" external thread at the back, centred 50 mm spacing, including valve and thermostat integrated into front panel.

Connections for dual energy operation: Flow/return 2 x $\frac{1}{2}$ " at bottom centre, spacing 50 mm and factory covered integrated electric heating element RACY-S, bottom right, with separate remote control device model 2.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with matching wall brackets and packaging.

Electric operation

Zehnder Metropolitan Spa decorative radiator, electric-only, for use as a bathroom and towel radiator. Flat-looking radiator with recessed slots, made from horizontally arranged flat tubes 70 x 8 mm, which are connected with a surrounding triangular profile frame without visible welded joints. With one or more openings (depending on height) for hanging towels.

Electric heating element RACY-S integrated elegantly in the frame profile, with connection cable (1,2 m), with Euro plug. Installation at bottom right. Dry-running protection against operation without sufficient heat transfer fluid, degree of protection IP44 (splash-proof), for mains power supply of 230 V. Separate, battery-operated remote control device model 2 for controlling the room temperature.

Standard version with powder coating, in colour RAL 9016, in special colour on request. Filled with heat transfer fluid. Delivered ready to install with elegant wall brackets.

| Output | Watt |
|--------|------|
| Height | mm |
| Length | mm |
| Model | |

Benefits

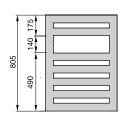

- Innovative radiator with flat design
- Clean look due to innovative welding technology
- Ideal towel hanging through large cut-out(s)
- Individually positionable designer towel hook
- Elegant solutions for valve integration on request
- Dual energy operation: electric heating element RACY-S integrated elegantly
- Side connections for easy replacement of old DIN standard radiators on request

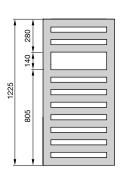

Special benefits for electric operation with RACY-S

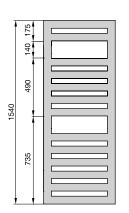

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Operation on hot water central heating system

Zehnder Metropolitan Bar decorative radiator for use as a bathroom and towel radiator. Flat-looking radiator with recessed slots, made from horizontally arranged flat tubes 70 x 8 mm, which are connected with a surrounding triangular profile frame without visible welded joints. With even structure incl. towel rail. Thermal output to EN 442; with CE marking. With 4 connections at bottom, 2 x central ½" for flow/return, spacing 50 mm and 2 x ½", outside left and right, with directional air vent.

Connections for Completto version: Flow/return 2 x %" external thread at the back, centred 50 mm spacing, including valve and thermostat integrated into front panel.

Connections for dual energy operation: Flow/return 2 x $\frac{1}{2}$ " at bottom centre, spacing 50 mm and factory covered integrated electric heating element RACY-S, bottom right, with separate remote control device model 2.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with matching wall brackets and packaging.

Electric operation

Zehnder Metropolitan Bar decorative radiator, electric-only, for use as a bathroom and towel radiator. Flat-looking radiator with recessed slots, made from horizontally arranged flat tubes 70 x 8 mm, which are connected with a surrounding triangular profile frame without visible welded joints. With even structure incl. towel rail.

Electric heating element RACY-S integrated elegantly in the frame profile, with connection cable (1,2 m), with Euro plug. Installation at bottom right. Dry-running protection against operation without sufficient heat transfer fluid, degree of protection IP44 (splash-proof), for mains power supply of 230 V.

Separate, battery-operated remote control device model 2 for controlling the room temperature.

Standard version with powder coating, in colour RAL 9016, in special colour on request. Filled with heat transfer fluid. Delivered ready to install with elegant wall brackets.

Benefits

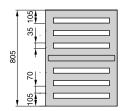

- Innovative radiator with flat design
- Clean look due to innovative welding technology
- Model with towel rail for easy hanging of towels
- Individually positionable designer towel hook
- Elegant solutions for valve integration on request
- Dual energy operation: electric heating element RACY-S integrated elegantly
- Side connections for easy replacement of old DIN standard radiators on request

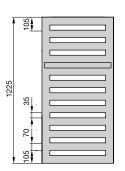

Special benefits for electric operation with RACY-S

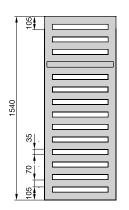

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Standard scope of delivery for operation on hot water central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow, return
- Completto: Pre-adjustable valve AV 9, chrome thermostat, connections: 2 x ¾" external thread (at the back)
- Dual energy operation: Electric heating element RACY-S, preassembled on the right, with remote control device, incl. batteries, selectable operating modes: manual (above room temperature), weekly programme, timer, off
- ½" chrome directional air vent
- Towel rail in chrome
- Mounting accessories in colour of radiator
- Packaging

Zehnder Kazeane

Radiator colour: Ruby Red, Traffic White

Operation on hot water central heating system

Zehnder Kazeane decorative radiator made from vertically arranged D-profile tubes rounded at the outside, 30×40 mm, plus offset and diagonally arranged flat tubes, 70×8 mm, which wrap around the bathroom radiator like a steel band. The resulting generous cut-outs on two levels create space for hanging several towels. Additionally, one or two horizontal flat tubes, depending on height. D-profile tubes arranged at the top and side, plus square tube, 30×30 mm, at bottom create a functional mounting plate.

Thermal output to EN 442, with CE marking. With 4 connections at bottom, 2 x central $\frac{1}{2}$ " for flow/return, spacing 50 mm and 2 x $\frac{1}{2}$ ", outside left and right, with directional air vent.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with matching wall brackets and packaging.

Electric operation

Zehnder Kazeane decorative radiator, electric-only, made from vertically arranged D-profile tubes rounded at the outside, 30×40 mm, plus offset and diagonally arranged flat tubes, 70×8 mm, which wrap around the bathroom radiator like a steel band. The resulting generous cut-outs on two levels create space for hanging several towels. Also features one horizontal flat tube. D-profile tubes arranged at the top and side, plus square tube, 30×30 mm, at bottom create a functional mounting plate.

With integrated electric heating element RACY-C, degree of protection IP44 (splash-proof), for mains power supply of 230 V. With connection cable 1,2 m in lenght, with two-pin plug. Installation at bottom left. Decorative radiator filled with heat transfer fluid. Separate, battery-operated remote control device model 2 for controlling the room temperature. Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome-plated. Delivered ready to install with matching wall brackets and packaging.

Benefits

- Individuality through exceptional design
- Many different heights at which to hang a towel
- The arrangement of the flat tubes on two levels makes it easier to hang multiple towels ideal for families
- Inconspicuous brackets concealed behind header tube
- Ample spaces between tubes make cleaning easy

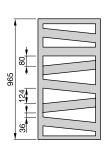

Special benefits for electric operation with RACY-C

- Remote control device can be positioned as required
- Regulated room temperatures
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Zehnder Roda Spa Asym

Radiator colour: Light Jeans

Operation on hot water central heating system

Zehnder Roda Spa Asym decorative radiator made from horizontally arranged precision flat tubes and vertical header tubes, without visible welds and fully welded.

Single-sided, asymmetrically arranged flat tubes 70 x 11 mm branching laterally from the manifold \varnothing 38 mm; towels can be easily slid in from the side to warm.

Thermal output tested to EN 442, with CE marking. With connections at bottom, 2 x $\frac{1}{2}$ " for flow/return, connection centre 50 mm, with directional air vent.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with wall brackets in colour of radiator.

Zehnder Roda Spa Asym

Operation on hot water central heating system:

WA = Wall clearance

K = Bracket V = Flow ½"

R = Return ½"

= Venting 1/8"

Operation on hot water central heating system

Zehnder Quaro decorative radiator made from horizontally arranged precision steel tubes with surrounding square tubes, fully welded, invisible welds due to laser welding technology. Square tubes 25 x 25 mm, regularly arranged in the frame of square 30 x 30 mm tube.

Thermal output tested to EN 442, with CE marking.

With recessed connections on lower square tube, central $\frac{1}{2}$ " for flow/return, connection centre 50 mm and outside left and right $\frac{1}{2}$ " for electric heating element, with directional air vent.

Connections for dual energy operation: Flow/return 2 x $\frac{1}{2}$ " at bottom centre, spacing 50 mm and factory integrated electric heating element RACY-S, bottom right, with separate remote control device model 2. Radiator with powder coating, in colour RAL 9016 as standard, in special colour, chrome or version in brushed V4A stainless steel on request.

Delivered ready to install with matching wall brackets and packaging. Room divider version: Radiator without attachment welded at back for wall bracket, incl. room divider mounting set.

Electric operation

Zehnder Quaro decorative radiator, electric-only, made from horizontally arranged precision steel tubes with surrounding square tubes, fully welded, invisible welds due to laser welding technology. Electric heating element RACY-S integrated elegantly underneath the frame profile, with connection cable (1,2 m), with Euro plug. Installation at bottom right. Dry-running protection against operation without sufficient heat transfer fluid, degree of protection IP44 (splash-proof), for mains power supply of 230 V. Separate, battery-operated remote control device model 2 for wall mounting for controlling the room temperature.

Standard version with powder coating, in colour RAL 9016, special colour, chrome or version in brushed V4A stainless steel on request. Filled with heat transfer fluid.

Delivered ready to install with elegant wall brackets.

| Operating pressure | max. 10,0 bar |

Benefits

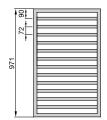

- Geometric clarity with consistent look
- Many different heights at which to hang a towel
- Hygienic and easy to clean
- Discreetly concealed brackets
- Also available as room divider version
- Dual energy operation: electric heating element RACY-S integrated elegantly

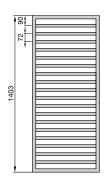

Special benefits for electric operation with RACY-S

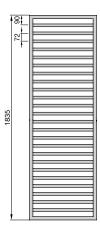

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Standard scope of delivery for operation on hot water central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections, connection centre 50 mm female thread for flow/return and electric heating element (on site) on left or right
- Dual energy operation: Electric heating element RACY-S, preassembled on the right, with remote control device, incl. batteries, with selectable operating modes: manual (above room temperature), weekly programme, timer, off. Electric heating element cover in colour of radiator
- Designer directional air vent, chrome ½"
- Mounting accessories in colour of radiator
- Packaging

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- Filled with heat transfer fluid
- Electric heating element RACY-S with remote control device, incl. batteries, with selectable operating modes: manual (above room temperature), weekly programme, timer, off
- Mounting accessories and electric heating element control box cover in colour of radiator
- Packaging

H = Height $H_1 = 30 \text{ mm}$ L = Length

(EL) 16

EL = Connection for electric heating element

K = Bracket
V = Flow ½"
R = Return ½"
* = Venting ½"
N = Connection centre

₋₃ = Fixing dimension, L - 30 mm

(EL)

80±5

50

R(V) | V(R)

- Lengthening possible with brackets for larger wall clearance
- ²⁾ The standard version of the radiator is not suitable for room divider installation
- 3) Max. 170 mm for installation with foot support in standard length

Radiator surface: Chrome

Operation on hot water central heating system

Zehnder Subway decorative radiator made from horizontally arranged precision steel tubes with surrounding square tubes, fully welded, invisible welds due to laser welding technology. Round tubes Ø 23 mm, regularly arranged in the frame of square 30 x 30 mm tube. Thermal output tested to EN 442, with CE marking.

With recessed connections on lower square tube, central ½" for flow/return, connection centre 50 mm and outside left and right ½" for electric heating element, with directional air vent.

Connections for dual energy operation: Flow/return 2 x 1/2" at bottom centre, spacing 50 mm and factory integrated electric heating element RACY-S, bottom right, with separate remote control device model 2. Radiator with powder coating, in colour RAL 9016 as standard, in special colour, chrome or version in brushed V4A stainless steel on request.

Delivered ready to install with matching wall brackets and packaging. Room divider version: Radiator without threaded bolts for wall bracket, incl. room divider mounting set.

Electric operation

Zehnder Subway decorative radiator, electric-only, made from horizontally arranged precision steel tubes with surrounding square tubes, fully welded, invisible welds due to laser welding technology. Electric heating element RACY-S integrated elegantly underneath the frame profile, with connection cable (1,2 m), with Euro plug. Installation at bottom right. Dry-running protection against operation without sufficient heat transfer fluid, degree of protection IP44 (splash-proof), for mains power supply of 230 V. Separate, battery-operated remote control device model 2 for controlling the room temperature.

Standard version with powder coating, in colour RAL 9016, special colour, chrome or version in brushed V4A stainless steel on request. Filled with heat transfer fluid. Delivered ready to install with elegant wall brackets.

| Operating pressure | max. 10,0 baı |

Benefits

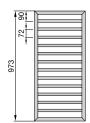

- Classic design
- Outside frame lends geometric look
- Generous spacing to hang towels
- Variant in brushed stainless steel
- Also available as room divider version
- Special 150 mm connection available
- Extra model for use as guest WC radiator
- Dual energy operation: electric heating element RACY-S integrated elegantly

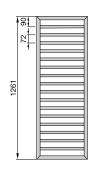

Special benefits for electric operation with RACY-S

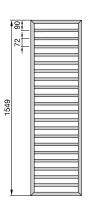

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Standard scope of delivery for operation on hot water central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow, return, left-hand or right-hand electric heating element (on site)
- Dual energy operation: Electric heating element RACY-S, preassembled on the right, with remote control device, incl. batteries, with selectable operating modes: manual (above room temperature), weekly programme, timer, off. Electric heating element cover in colour of radiator
- ½" chrome directional air vent
- Mounting accessories in colour of radiator
- Packaging

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- Filled with heat transfer fluid
- Electric heating element RACY-S with remote control device, incl. batteries, with selectable operating modes: manual (above room temperature), weekly programme, timer, off
- Mounting accessories and electric heating element control box cover in colour of radiator
- Packaging

- 2) For installation with foot support in standard length

Operation on hot water central heating system

Zehnder Toga decorative radiator made from horizontally arranged precision steel tubes with vertical, fully welded D-profile tubes and invisible welds due to laser welding technology. Round tube \varnothing 23 mm, D-tube 30 x 35 mm.

Thermal output tested to EN 422, with CE marking.

Flow/return connection in centre $\frac{1}{2}$ " or outside left and right $\frac{1}{2}$ ", connection 50 mm for connection fitting, connection for electric heating element 2 x $\frac{1}{2}$ " at bottom on D-profile tube; air vent to top $\frac{1}{4}$ ". Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request.

Delivered ready to install with matching wall brackets, packaging.

.....

Zehnder Toga designer radiator, electric-only, made from horizontally arranged precision steel tubes with vertical, fully welded D-profile tubes and invisible welds due to laser welding technology. With integrated electric heating element RACY-C, degree of protection IP44 (splash-proof), for mains power supply of 230 V. Connection cable (1,2 m) with Euro plug. Installation at bottom left. Decorative radiator filled with heat transfer fluid. Separate, battery-operated remote control device model 2 for controlling the room temperature.

Delivered ready to install with elegant wall brackets. Standard version with powder coating in colour RAL 9016, in special colour or chrome on request, with packaging.

Benefits

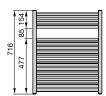

- Harmonious design through D-profile of vertical tubes
- Can be used as a room divider
- Large cut-outs
- High output due to internal tube design
- Wide range of models
- Top-grade chrome finish

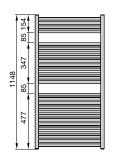

Special benefits for electric operation with RACY-C

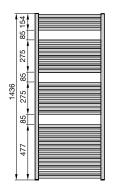

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Operation on hot water central heating system

Zehnder Forma Asym decorative radiator made from horizontally arranged precision steel tubes welded to vertically arranged round tubes. Invisible connection due to capstan welding technology. Horizontal tubes each branch asymmetrically from the laterally arranged manifolds. Horizontal steel tubes \varnothing 25 mm, vertical header tubes \varnothing 38 mm.

Thermal output tested to EN 442, with CE marking.

With connections at bottom, 2 x $\frac{1}{2}$ " for flow/return, connection centre 50 mm. Alternatively with additional 2 x $\frac{1}{2}$ " centre connections, spacing 50 mm for flow/return. Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with elegant wall brackets.

Electric operation

Zehnder Forma Asym decorative radiator as multifunctional bathroom heater, electric-only, made from horizontally arranged precision steel tubes welded to vertically arranged round tubes with invisible welds due to capstan welding technology. Horizontal steel tubes \varnothing 25 mm, vertical header tubes \varnothing 38 mm.

With integrated electric heating element RACY-C, degree of protection IP44 (splash-proof), for mains power supply of 230 V. Connection cable (1,2 m) with Schuko plug. Decorative radiator filled with heat transfer fluid. Separate, battery-operated remote control device model 2 for controlling the room temperature.

Delivered ready to install with elegant wall brackets. Standard version with powder coating, in colour RAL 9016, in special colour on request.

| Output | Watt |
|--------|------|
| Height | mm |
| Length | mm |
| Model | |

Benefits

- Cross-connected tubes lend relaxed look
- Open access from both sides makes it very convenient for hanging and sliding towels in from the side
- Large wall clearance for snuggly warm towels
- Diverse range of models with left-hand or right-hand version
- Dual energy operation possible with centre connections as an option

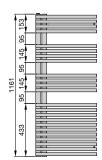

Special benefits for electric operation with RACY-C

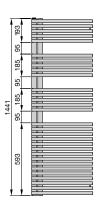

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Zehnder Forma Spa

Radiator colour: Beige Quartz

Operation on hot water central heating system

Zehnder Forma Spa decorative radiator made from horizontally arranged precision steel tubes welded to vertically arranged round tubes. Invisible connection due to capstan welding technology. Single or double-layer version.

Horizontal steel tubes Ø 25 mm, vertical header tubes Ø 38 mm. Thermal output tested to EN 442, with CE marking.

With centre connections, ½" for flow/return, connection centre 50 mm and outside left and right, ½" for electric heating element, with directional air vent. Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome on request; with packaging. Delivered ready to install with elegant wall brackets.

m Electric operation

Zehnder Forma Spa decorative radiator as multifunctional bathroom heater, electric-only, made from horizontally arranged precision steel tubes welded to vertically arranged round tubes with invisible welds due to capstan welding technology. Horizontal steel tubes \varnothing 25 mm, vertical header tubes \varnothing 38 mm.

With integrated electric heating element RACY-C, degree of protection IP44 (splash-proof), for mains power supply of 230 V. Connection cable (1,2 m) with Schuko plug. Installation at bottom right. Decorative radiator filled with heat transfer fluid. Separate, battery-operated remote control device model 2 for controlling the room temperature. Delivered ready to install with elegant wall brackets. Standard version with powder coating, in colour RAL 9016, in special colour or chrome on request.

Benefits

- Cross-connected tubes lend relaxed look
- Double-layer models for high thermal output
- Large wall clearance for snuggly warm towels
- Centre connections
- Available with matching connection fittings
- Dual energy operation possible without T-piece

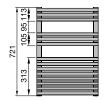

Special benefits for electric operation with RACY-C

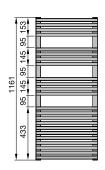

- Remote control device can be positioned as required
- Regulated room temperature
- Comfortable operation as needed by customisable daily and weekly programmes
- Energy-efficient and comfortable heating via innovative open window detection
- Low energy consumption in stand-by mode (≤ 0,5 W)
- Keylock can be activated as required
- Timer function for up to 2 hours
- Ready-to-plug

Standard scope of delivery for operation on hot water central heating system

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow, return, electric heating element
- ½" directional air vent
- Mounting accessories in colour of radiator
- Packaging

Standard scope of delivery for electric operation

- Powder coating to DIN 55900, RAL 9016
- Filled with heat transfer fluid
- With integrated electric heating element RACY-C, bottom right, with remote control device, incl. battery, with selectable operating modes: manual (above room temperature), weekly programme, timer, off
- Mounting accessories in colour of radiator
- Packaging

- ① For special colours in categories 1 and 2, see "Special solutions" and "Colour chart"
- 3 Total height incl. electric heating element

For legend, see "Electric operation and Ecodesign Directive" on page 173

¹⁾ Maximum operating pressure for dual energy operation: 4 bar

Zehnder Fina Lean Bar

Radiator surface: Cream

Operation on central heating system

Zehnder Fina Lean Bar decorative radiator with smooth front panel made of sheet steel in elegant and slim design, even surface and rounded sides for mounting desired towel rails. One towel rail included in scope of delivery. Heat output according to EN 442, with CE marking. With 2 x 1/2" female thread connection for flow/return at bottom centre, spacing 50 mm, air vent 1/2" at top in back. Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with wall brackets and packaging.

max. 6.0 bar max. 110 °C mm mm

Benefits

- Slim, elegant design
- Easy to clean due to smooth surface
- Convenient hanging of towels with height-adjustable towel rail
- Optional: additional towel rail for hanging up more towels
- Pleasant warmth due to high proportion of radiation

Electric-only operation

Zehnder Fina Lean Bar decorative radiator with smooth front panel made of sheet steel in elegant and slim design, even surface and rounded sides for mounting desired towel rails. One towel rail included in scope of delivery. Radiator with sheet steel on the back side, an inside heating wire and a graphite plate between heating wire and front for even and fast heat distribution.

With CE marking. Separate, battery-operated remote control device model 2, heating element RACY-S without visible control components on the radiator. Splash-proof IP44, mains connection 230 V. Connection cable 1.2 m long with Schuko plug.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour on request. Delivered ready to install with wall brackets and packaging.

Standard scope of delivery for operation on central heating system

- Powder coating to DIN 55900, RAL 9016
- Towel rail in chrome
- 2 x ½" connections at bottom, centric 50 mm
- 1/2" air vent
- Mounting accessories in colour of radiator
- Packaging

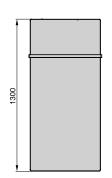

Special advantages for electric operation RACY-S

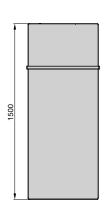

- Aesthetically appealing design due to concealed electric heating element
- Flexible control options: control device for wall mounting or base.
- Diverse adjustment options: Regulated room temperature or operation in energy-saving or frost-protection mode
- Customizable daily and weekly programmed for convenient, on-demand operation
- Energy-efficient and comfortable heating with innovative open window detection
- Low energy consumption of only 0.5 W in stand-by mode for increased energy efficiency
- Timer function for on-demand operation. Ready-to-plug for easy and quick installation

Operation on hot water central heating system

Zehnder Klaro makes a strong impression through its look and functionality. And the reason is its sophisticated tube design and variable wall clearance. The radiator is ideal for heating towels.

Zehnder Klaro decorative radiator made from horizontally arranged precision steel tubes Ø 23 mm with vertical, fully welded round tubes Ø 38 mm and invisible welds due to laser welding technology. Thermal output tested to EN 422, with CE marking.

Connections at top and bottom of the manifold tubes for flow, return, air vent, blanking plug, 4 x $\frac{1}{2}$ female thread. Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome, with packaging. Delivered ready to install with matching wall brackets.

Electric operation

Zehnder Klaro decorative radiator, electric-only, made from horizontally arranged precision steel tubes Ø 23 mm with vertical, fully welded round tubes Ø 38 mm and invisible welds due to laser welding technology.

Equipped with integrated electric heating element and control unit TIMERMEMO with connection cable 1,2 m long without plug, for mains supply of 230 V \pm 10%, appliance class II.

Radiator with powder coating, in colour RAL 9016 as standard or in special colour, with packaging. Delivered ready to install with matching wall brackets.

Radiator for electric operation with Musa Eco

Electric operation

Zehnder Aura decorative radiator made from horizontally arranged precision steel tubes with vertical D-profile tubes. Round tube Ø 22 mm, D-tube 30 x 40 mm. With built-in electric heating element Musa Eco. Protection class IP 44 (splash-proof), for mains power supply of 230 V. Connection cable (1,3 m) with Euro plug. Installation at bottom right. Decorative radiator filled with heat transfer fluid.

Delivered ready to install with elegant wall brackets. Standard version with powder coating, in colour RAL 9016, in special colour on request.

Benefits

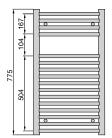

- High energy efficiency due to compliance with the European Ecodesign Directive reduces energy costs
- User-friendly control device allows simple operation
- Customisable daily and weekly programmes for convenient, on-demand operation
- Increased safety with keylock

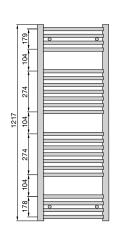

Standard scope of delivery

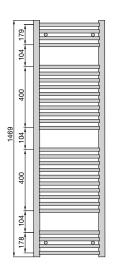

- Powder coating to DIN 55900, RAL 9016
- Filled with heat transfer liquid
- With integrated electric heating element MUSA Eco with seven operational modes: comfort, night, anti-freeze, fil-pilot, chrono, timer- 2h, stand-by, right-mounted
- Mounting accessories in colour of radiator
- Packaging

Benefits

- Harmonious design
- Large cut-outs
- Top-grade chrome finish
- Easy to clean
- Entry-level model for all types of tender businesses
- Attractive curvature

Standard scope of delivery

- Powder coating to DIN 55900, RAL 9016
- 2 x ½" connections for flow, return or
- 4 x ½" connections for flow, return, electric heating element
- 1 x blind plug ½" or
 - 3 x blind plug 1/2" with middle connection
- 1 x air vent ½"
- Accessories in colour of radiator
- Packaging

Operation on hot water central heating system

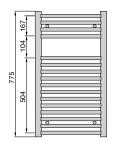

Zehnder Aura Bow decorative radiator made from horizontally arranged precision steel curved tubes with vertical D-profile tubes. Round tube Ø 22 mm, D-tube 30×40 mm.

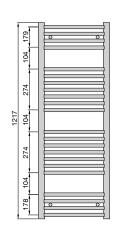

Thermal output tested to EN 422, with CE marking. 4 x ½" for flow/return in the manifold tube with air vent ¼". Alternatively with centre connections ½", distance 50 mm, flow and return freely selectable. Delivered ready to install with matching wall brackets. Radiator with powder coating, in colour RAL 9016 as standard and in chrome, with packaging.

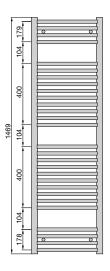

Maximum operating pressure max. 10,0 bar
Operating temperature max. 90 °C

Clarity and class. Zehnder Virando has what any lover of modern style looks for. A clear design, with horizontal and straight tube elements allows for ample space for hanging towels.

Zehnder Virando designer radiator made from horizontally arranged precision steel tubes with vertical D-profile tubes. Round tubes Ø 23 mm, D-tubes 30 x 40 mm. Available in almost any colour and finish from the Zehnder colour chart. Delivered ready to install with matching wall brackets, packaging.

Maximum operating pressure Operating temperature

max. 12 bar max. 120 °C

Radiator for electric operation with TIMERMEMO

Benefits

- Timeless design creates an aesthetic accent
- Generous spaces between the tubes convenient for hanging towels
- Top-grade chrome finish
- Ample spaces between tubes make cleaning easy
- Flexible installation due to 50 mm centre connections

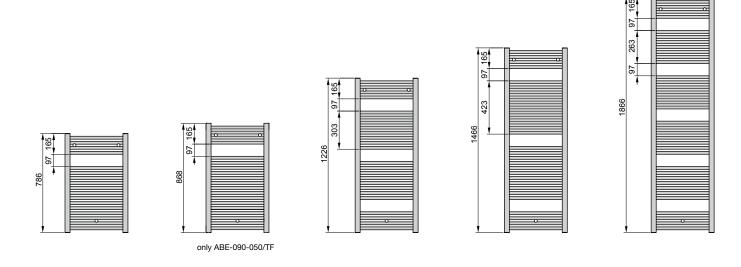

Special benefits for electric operation with TIMERMEMO

- Energy-efficient and comfortable heating via innovative "open window detection"
- Low energy consumption of only 0,5 W in stand-by mode for increased energy efficiency
- Operation by smartphone with Zehnder Control app
- Comfortable operation as needed by customisable daily and weekly programme
- Timer function for on-demand operation
- With flying lead to connect in accordance with local electrical regulations

Zehnder Impa

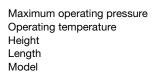

Operation on hot water central heating system

Zehnder Impa stands out because of its subtle elegance and practical functionality. The geometric design with the square tube elements is a perfect fit for any bathroom. The generous clearance between the sets of tubes makes hanging and warming towels easy. The radiator is available in white and with a high-quality chrome finish.

Benefits

- Timeless design with square headers is ideal for classic bathrooms
- Small radiator depth ideal for narrow rooms
- Easy cleaning with the lambswool cleaning brush from Zehnder
- Generous spaces between the tubes convenient for hanging towels

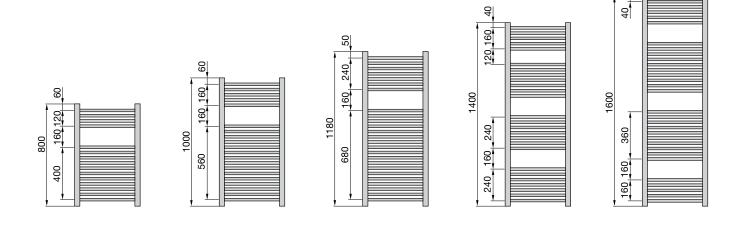

Standard scope of delivery

- Powder coating to DIN 55900, RAL 9016
- 4 x ½" connections for flow/ return, air vents
- 1 x blind plug ½"
- 1 x air vent ½"
- Accessories in colour of radiator
- Packaging

²) Yucca, Yucca Asym.

Electric heating elements for dual energy operation

Electric heating element WIVAR II 1)

Standard version for temperature control directly at electric heating element (as towel warmer \Box) or via optional control device model 1 (as electric radiator \Box). With control knob to set the medium temperature and LED indicator for the operating mode (see below); white plastic box, Ø 34 mm; 134 mm in length.

Nominal output 300, 600, 900 or 1200 watts. Supply voltage 230–240 V, protection class I (with earth wire), VDE-tested, IP64 degree of protection (splash-proof). With conical ½" screw-in thread incl. assembly key. 3-core connection cable, 1,20 m, downwards outlet with white plug.

Operating modes

- Frost protection ~12°C (LED flashes blue every 10 s)
- Heating level 1 ~50°C (green LED)
- Heating level 2 ~65°C (orange LED)
- Timer ~65°C for 2 h (LED flashes orange every 2 s)

Suitable for Zehnder decorative radiators: Yucca, Yucca Asym, Subway, Toga, Forma Spa (for allocation of output to the radiator models, see product pages)

| Model | Nominal output Watt | Length max. mm | Article number | Price € |

| WIVAR Hotel 1200 | 1200 | 830 | 862490 | 509,89 |

Cover parts for electric heating element WIVAR II / WIVAR Hotel For adapting the electric heating element to the radiator colour

| Version | Article number | Price € |
|------------------------------------|-------------------|------------|
| Cover parts set, chrome-plated | 889308 | 112,17 |
| Cover parts set, in special colour | 889309 | 89,71 |

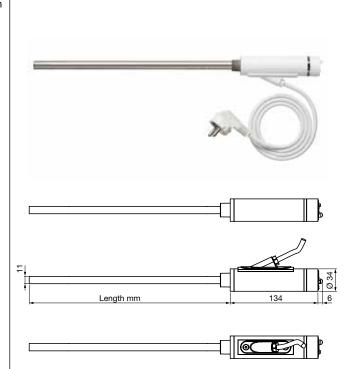

Control device model 1

Battery-operated remote control device (white plastic housing) for room temperature control and for controlling timer functions for WIVAR II; dimensions 88 x 88 x 21 mm.

| Model | Article number | Price € |
|-------------------------------|----------------|------------|
| Control device model 1, white | 895351 | 216,83 |

Functions

- Frost protection ~12°C
- Room temperature control with 4 adjustable temperatures
- \blacksquare Timer ~65°C with selectable times: 1/2/4 h
- Battery status indicator
- Option to load a weekly programme using Bluetooth and the Android and iOS app

¹⁾ Can be used in hot water heating systems with max. operating temperature of 85°C For legend, see "Electric operation and Ecodesign Directive" on page 173

Electric heating elements for dual energy operation

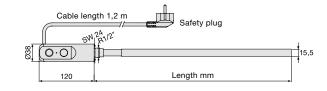

Electric heating element DBM 2)

Degree of protection IP44 (splash-proof), for supply voltage 230 V $\pm 10\%$. With G $1\!\!\!/_2$ " screw-in thread and 3-core connection cable (1,2 m) with safety plug, collar and assembly key. With dry-running protection against operation without sufficient filling quantity. With rotary knob for selecting the following operating modes:

- Medium temperature max. 40°C
- Medium temperature max. 70°C
- Timer with automatic shut-off after 2 hours
- Off

| Model | Nominal output Watt | Max. length in mm | Article number | Price € |

| DBM 1200 white | 1200 | 800 | 857521 | 542,22 |

Suitable for decorative radiators: Kazeane, Toga, Forma Spa (for allocation of output to the radiator models, see product pages)

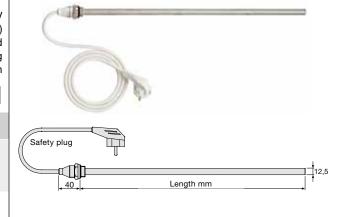

Electric heating element RICA 2)

Degree of protection IP54 (splash-proof), for mains voltage of 230 V ±10%. With G ½" screw-in thread and 3-core connection cable (1,2 m) with safety plug. With integrated temperature controller, with fixed nominal value of 70°C and safety temperature limiter, without dry-running protection. (The electric heating element must be replaced after activation of the temperature limiter. Cannot be repaired!)

| Model | Nominal output Watt | Max. length in mm | Article number | Price € |

Suitable for decorative radiators: Toga (for allocation of output to the radiator models, see product pages)

For legend, see "Electric operation and Ecodesign Directive" on page 173

Electric heating elements for dual energy operation

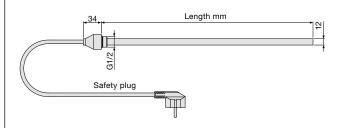

Electric heating element IHE 2)

Degree of protection IP65 (protected from low pressure water jets from any direction), protection class I, for main voltage 230 Volt ±10 %. With G ½" screw-in thread and 3-core connection cable (1,2 m) with safety plug. With built-in temperature control, patended by Zehnder, for energy saving operation and increased life-span compared to conventional heating elements. The patended temperature control causes the heating element to quickly heat-up and when reaching its temperature limit to reduce its power consumption to 50 %, resulting in reduced switching cycles and avoiding over-heating. This reduces the power consumption in continuous operation, ensures a safe operation and through reduced switching cycles increases the life-span of the heating element. Temperature limit of heat transfer fluid approx. 70 °C. With dry-running protection (after response of the temperature limiter and repair of the cause e.g. low fluid level, the heat element can be further used after a reset). Housing and cable / plug in white. The immersion heater IHE can be used in dual energy operation without control or in combination with on-site regulation.

| Model | Nominal output Watt | Max. length ³⁾ in mm | Article number | Price € |
|-----------|------------------------|---------------------------------|-------------------|------------|
| IHE White | 300 | 400 | 858151 | 83,97 |
| IHE White | 600 | 620 | 858161 | 88,67 |
| IHE White | 900 | 850 | 858171 | 97,91 |

Suitable for Zehnder decorative radiators: Yucca, Metropolitan, Kazeane, Quaro, Subway, Toga, Forma

T-piece

For dual energy operation of hot water central heating system with electric heating element. Installation of the T-piece in the return for vertical installation of the electric heating elements WIVAR II / WIVAR Hotel, RICA or DBM¹) and connection of the return via an angled return screw connection.

| | 53181 | |
|-----------------------------------|-------|-------|
| | 10100 | 27,19 |
| T-piece chrome (WIVAR, RICA, IHE) | 53188 | 28,34 |
| T-piece white (DBM, IHE) 85 | 53111 | 27,19 |
| T-piece chrome (DBM, IHE) | 53118 | 28,34 |

¹⁾ T-piece for DBM incl. O-ring and collar

²⁾ Can be used in hot water heating systems with max. operating temperature of 95°C and maximum operating pressure of 4,0 bar

³⁾ Manifold, in which the heat element is build-in needs to have 1,5 times the length of the heating element

Conversion factors f_1 for converting the standard thermal output at 75/65/20°C to other system temperatures: $\Phi = \Phi_S \cdot f_1$

The radiator exponent depends on the model and type of radiator and can therefore be found in the table containing the technical specifications for the respective radiator. For exponents other than those given, the correction factor can be interpolated or precisely calculated according to the above formulae. An exponent of 1,3 can be used for the approximate calculation.

$$\begin{split} \Phi &= \Phi_{\mathbb{S}} x \ f_1 \ \text{ or } \Phi = \Phi_{\mathbb{S}} x \left(\frac{\Delta t}{\Delta t_n}\right)^n \\ \text{with } \Delta t &= \frac{(t_1 - t_r) - (t_2 - t_r)}{\ln \left(\frac{t_1 - t_r}{t_2 - t_r}\right)} = \frac{t_1 - t_2}{\ln \left(\frac{t_1 - t_r}{t_2 - t_r}\right)} \end{split}$$

Example for Zehnder Yucca:

What is the effective output at 60/45/24°C?

Model YSD-130-080;
$$\Phi_{\rm S}$$
 = 1024 W, exponent n = 1,30 t_1 = 60°C, t_2 = 45°C, t_r = 24°C

 f_1 from table: $f_1 = 0,469$ $\Phi_S = \Phi_S \times f_1 = 1024 \text{ W} \times 0,469 = 480 \text{ W}$

Accessories

A wide range of accessories are available for various additional uses, such as hanging up towels. For more information, see the section on "Accessories".

Baffle

To avoid reduced output, e.g. with a riding connection, internal installations, e.g. baffles, deflector plates, guide plates, are required. Detailed information is available on request.

Benefits

See "Product description"

CE marking

The CE marking on Zehnder radiators shows that they are manufactured in accordance with the prevailing European standard EN 442 and that the product has been subjected to the prescribed conformity evaluation procedure.

The following parameters, which allow the CE marking to be shown, can be found in the respective product section:

- Model description
- Max. operating pressure
- Nominal heat output

| Product/product family | CE - Year | | | |
|------------------------|-----------|--|--|--|
| Zehnder Alban | CE - 20 | | | |
| Zehnder Archibald | CE - 16 | | | |
| Zehnder Deseo Verso | CE - 20 | | | |
| Zehnder Arteplano | CE - 17 | | | |
| Zehnder Chime | CE - 20 | | | |
| Zehnder Folio Belt | CE - 16 | | | |
| Zehnder Folio Hybrid | CE - 17 | | | |
| Zehnder Fain | CE - 21 | | | |
| Zehnder Yucca | CE - 05 | | | |
| Zehnder Vitalo | CE - 13 | | | |
| Zehnder Charleston | CE - 05 | | | |
| Zehnder Zenia | CE - 17 | | | |
| Zehnder Metropolitan | CE - 09 | | | |
| Zehnder Kazeane | CE - 17 | | | |
| Zehnder Roda | CE - 08 | | | |
| Zehnder Quaro | CE - 11 | | | |
| Zehnder Subway | CE - 08 | | | |
| Zehnder Toga | CE - 05 | | | |
| Zehnder Forma | CE - 05 | | | |
| Zehnder Klaro | CE - 16 | | | |
| Zehnder Stalox | CE - 06 | | | |
| Zehnder Bluebell | CE - 19 | | | |
| Zehnder Aura | CE - 13 | | | |
| Zehnder Fina Lean Bar | CE - 20 | | | |
| Zehnder Virando | CE - 16 | | | |
| Zehnder Impa | CE - 14 | | | |
| Zehnder Zeta | CE - 14 | | | |

Cleaning

With a lambswool cleaning brush or soft cloth. Detailed information is available on request.

Conversion

Factor for converting the standard thermal output to thermal outputs at other system temperatures; see conversion table of f₁ factors

Corrosion protection

See "Finish" and "Surface protection"

Degree of protection

The degree of protection specifies the extent of protection that electrical equipment housing provides against dangerous parts getting into the equipment. The first number indicates the protection against the ingress of foreign objects, and the second the ingress of water.

Example: IP44

- number = 4 = protection against solid foreign objects,
 num diameter or larger
- 2. number = 4 = protection against splash water

Dimensions

The dimensions indicated in the documentation are correct at the time of printing. Subject to change without notice.

Electric heating elements

Maximum temperature:

The maximum achievable temperature of the bathroom radiator depends on the following parameters: Nominal thermal output of the radiator, nominal output of the electric heating element, surrounding temperature, time switched on.

Output:

Only a limited electrical output can be installed in the bathroom radiators for safety reasons. Generally, the nominal output of the electric heating element of all Zehnder bathroom radiators should not be greater than the nominal output of the bathroom radiator $(\Phi_L$ at ΔT 50 K according to EN 442).

Mounting:

The electric heating element must be sealed with hemp or Teflon tape so that the mains cable is at the back facing the wall.

Please note:

- The electrical installation must comply with local regulations.
- In stationary installation (without plug), a switch must be installed (all-phase isolation from the mains with min. 3 mm contact spacing).
- The bathroom radiator with integrated electric heating element in central heating systems must always be completely filled with water and vented, observing the maximum permissible operating temperature of the applicable electric heating element in hot water heating systems.
- The expansion of the water in the system into the expansion vessel must be guaranteed at all times (do not block return).
- For electric-only bathroom radiators, the defined filling quantity must not be changed.
- The electric heating element must only be opened and the mains cable only replaced by the manufacturer.
- The electric heating element must only be installed vertically (housing always beneath the electric heating element).
- When using radiators with electric heating elements, the qualified electrician is the competent partner for the protective measures to be taken
- Follow the operating instructions.

Position of electrical connection:

In bathrooms and other wet rooms, special conditions apply to the installation of switches and sockets according to DIN 57100/ VDE0100. The suggested position of the socket is chosen so as to facilitate an easy connection. This suggestion does not release the electrical engineer from executing the electrical connection in accordance with local regulations.

Minimum clearances:

The minimum wall and floor clearances must be complied with (see relevant radiator chapter).

The minimum floor clearance must meet the user requirements. The clearance must be increased accordingly in public buildings and to allow the use of cleaning machines.

Electric operation and Ecodesign Directive

In deviation from dual energy operation in a central heating system, all electric radiators are fixed units that comprise the actual radiator body, a filling medium (heat transfer fluid), a heating element and associated controls. This unit is subject to a special function test and must not be changed. The heat transfer fluid is frost-proof up to -20°C as long as there are no other restrictions associated with the standard scope of delivery for the radiator in question. The product portfolio also includes dry electric radiators. A large number of radiator models with different control and regulation options are available for a wide range of applications.

Electric radiators are subject to the Ecodesign Directive. The aim of this Directive is to reduce the environmental effects of products that consume energy, with the entire product life-cycle taken into account. A points system is used to evaluate the extent to which the Directive has been fulfilled. Various functions, such as standby power consumption ≤ 0.5 W, weekly programme and open window detection, help to fulfil the minimum legal requirements (that is, they help to achieve the minimum number of points). Devices that meet the minimum requirements and are thus compliant with the Ecodesign Directive are marked with this symbol in the price list: Towel warmers are not subject to the Ecodesign Directive. They are not intended for room heating and are marked with this symbol: \square .

The following table provides an overview of the available products combined with different control and regulation devices:

| Product/ product family | Control device | Control device in combina- tion with app | Operation on electric heating element | without control device |
|-------------------------------|-------------------|------------------------------------------------------|------------------------------------------------|------------------------------|
| Zehnder Archibald | | | | |
| Zehnder Deseo Verso | | | | |
| Zehnder Folio Glass | | | | |
| Zehnder Folio Hybrid | | | | |
| Zehnder Zenia ¹⁾ | | | | |
| Zehnder Fain | | | | |
| Zehnder Yucca | | | | |
| Zehnder Vitalo | | | | |
| Zehnder Roda Twist Spa Air | | | | |
| Zehnder Metropolitan | | | | |
| Zehnder Kazeane | | | | |
| Zehnder Quaro | | | | |
| Zehnder Subway | | | | |
| Zehnder Toga | | | | |
| Zehnder Forma | | | | |
| Zehnder Klaro | | | | |
| Zehnder Aura | | | | |
| Zehnder Fina Lean Bar | | | | |
| Zehnder Virando | | | | |

| | Electric radiator (standard) |
|----------|--------------------------------------------|
| | Electric radiator (available as an option) |
| <u>r</u> | Towel warmer (standard) |
| P | Towel warmer (available as an ontion) |

The certification of our environmental management system to DIN EN ISO 14001 by an independent institution obliges us to make continuous improvements to our environmental services through reducing or avoiding environmental burdens and waste, encouraging the utilisation and protection of resources as well as observing all environmental laws and regulations applicable to us.

Finish

Ready-painted radiators in this price list have a two-coat finish (to DIN 55900, Part 1 and 2, comprising primer and top coat). The top coat is a powder coating. The high-quality Zehnder powder coating produces an especially smooth and extremely durable surface. Further information on the applications and limits of radiators is contained in information sheet number 7 of the BDH (Bundesverband der Deutschen Heizungsindustrie e.V.). Please <u>always</u> use the original RAL, NCS colour samples or original colour charts of the sanitary manufacturers for exact colour matching.

For technical production reasons, minor colour deviations are possible in paints on steel surfaces, also when taking the prevailing lighting conditions into account. Deviations can also occur when comparing painted steel surfaces (radiators) with ceramic products. The colours shown here (see inside of back cover) are <u>not</u> binding for printing reasons. Radiators in metallic colours, e.g. RAL 9006, RAL 9007 and Anthracite are unique products and visual differences may appear in the colour, depending on the radiator.

Fixings

To ensure that radiators are fitted safely, the weight of the radiator and other aspects must be considered when choosing the right quality and quantity of brackets. Additional loads and foreseeable misuse of a radiator must be considered or ruled out by planning and implementation in line with the known building use. The installation situation and accessibility are just as important criteria as brickwork, bracket shape, location of the suspensions, locking device, add-on elements and the like. See also VDI 6036.

Flow connection

This concerns the connection on the radiator through which the hot water flows into the radiator.

Galvanisation

See "Surface protection"

Galvanisation

Galvanisation creates structures on the surface.

These are caused by the technological process and therefore are not a fault. We cannot guarantee a clean, smooth surface. Galvanised radiators are generally delivered with a top coat. For explanation, see "Surface protection".

| Product/product family | Special version, galvanised |
|----------------------------|-----------------------------|
| Zehnder Alban | - |
| Zehnder Archibald | - |
| Zehnder Arteplano | х |

| | |

Hydraulic balancing

By hydraulic balancing the various system resistances are set so that the radiators are supplied with the necessary quantity of water at all operational points, in order to achieve the desired thermal output.

Inlet and outlet resistance

The coefficient of resistance (zeta value) is used to calculate the pressure loss. For more information, see "Pressure loss".

Minimum water flow

If the flow of water through a radiator is heavily reduced, the heat output can fall far below the calculated or indicated value. For this reason, a minimum water flow should always be ensured. The following table shows the approximate minimum water flows $q_{m\,min}$ in % of the nominal flow rate q_{ms} which does not cause the heat output to deviate from the standard characteristic curve by more than 5%.

| Product/product family | $\mathbf{q}_{\mathrm{m}\mathrm{min}}$ in % of \mathbf{q}_{ms} |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| Zehnder Archibald | 30% |
| Zehnder Yucca, Zehnder Metropolitan, Zehnder Kazeane, Zehnder Roda Spa Asym, Zehnder Quaro, Zehnder Toga, Zehnder Forma, Zehnder Klaro, Zehnder Stalox, Zehnder Aura, Zehnder Bluebell, Zehnder Impa, Zehnder Zeta | 27% |
| Zehnder Arteplano, Zehnder Charleston, Zehnder Fina, Zehnder Folio / Folio Belt, Zehnder Vitalo | 17 % |
| Zehnder Virando, Zehnder Impa, Zehnder Zeta | 27% |

Nominal heat output

The nominal heat output of a radiator is determined in an independent, certified test laboratory according to standard EN 442 at the standard operating temperatures of 75/65/20°C. The conversion of the thermal output to other system temperatures is done on the basis of the nominal heat output according to EN 12831. For easy dimensioning, additional outputs for frequently used temperatures are shown alongside the nominal heat output:

- 70/55/24 °C
- 55/45/24 °C
- 55/45/20 °C

The conversion of the nominal heat output to deviating system temperatures can be done using the f_1 -factors on the conversion factors page.

Operating pressure

The maximum permissible operating pressure of a radiator depends on its geometry, the material used and the finish. Max. permissible operating pressure according to product:

| Product/product family | Standard version | High-pressure version |
|---------------------------------------|------------------|-----------------------|
| · · · · · · · · · · · · · · · · · · · | [bar] | [bar] |

Suitable fittings, plugs and air vents, etc. must be ensured in connection with high pressure applications in excess of 10 bar. Pressure loads up to max. 18 bar are only adaptable for suitable radiators and components as long as pressure shocks can be ruled out.

Operating temperature

Zehnder radiators can generally be used for hot water heating systems up to 110°C. Exceptions are noted on the product in question. They are suitable for use in district heating, low temperature and condensing systems.

Packaging

The packaging of Zehnder radiators serves as protection against damage during transport and on building sites. It must be removed before starting the system for the first time in order to avoid any damage caused by condensation.

Pressure loss

Inlet and outlet resistance per radiator for water flow rates of up to 1 m/s $\zeta=3.0.$

The pressure losses of the presettable standard valve sets to be taken into consideration when designing the pump and basic network layout can be taken from the diagrams on the valve characteristics page.

Prices

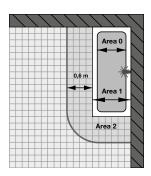

See General Sales and Delivery Conditions. You can find these under "Legal notice" on our homepage at www.international.zehnder-systems.com.

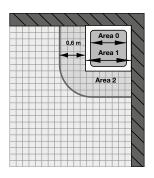

Product description

At the beginning of each chapter is a description of the radiator together with its product-specific benefits and applications.

Protected areas

The provisions of VDE 0100 must be observed when installing radiators with electric heating elements in wet rooms. Examples of the protected area classification for electrical equipment according to VDE 0100 PART 701 for baths and showers.

Areas 0 and 1:

Comprise the inside and surrounding areas of bath tubs and shower trays, area 1 ends at the outer edge of the tub/tray. No radiators with electric heating elements must be installed or connected in these areas.

Area 2:

Radiators with electric heating elements can be installed and connected here. The electric heating elements and the connection must have at least degree of protection IPX4 (WIVAR II, WIVAR Hotel, RICA, DBM, RACY).

If the connection is made via a plug and socket, the socket must be outside of areas 0, 1 and 2.

Quality check

Zehnder Group Deutschland GmbH is certified to DIN ISO 9001 and is therefore subject to stringent quality controls carried out by independent institutions in the areas of Design/Development, Production, Assembly and Customer Service.

Room divider

An overview of how the designer bathroom radiator can be used as a room divider is provided by the following table. Detailed information can be found in the respective product chapters.

Reduced output

The thermal output can be affected depending on where the radiator is installed. The nominal heat output is measured in an unobstructed setting with a ground clearance of 110 mm and a wall clearance of 50 mm. Any reduction in these clearances, as well as installation in alcoves and the application of covers and grilles can, depending on the model, lead to a reduction in thermal output.

Standard water flow q_{ms}

(heating agent flow, flow quantity, mass flow)

The nominal flow rate q_{ms} of a radiator gives a temperature spread of 10 K at a flow temperature of 75°C (standard thermal output conditions)

$$q_{ms} = \frac{\stackrel{\frown}{\Phi}}{c_p \left(t_1 - t_2\right)} \quad c_p \approx 4187 \, \frac{J}{kg \cdot K}$$

The actual water flow ${\rm q}_{\rm m}$ of a radiator can, at flow and return temperatures other than 75/65°C, deviate significantly from the nominal flow rate ${\rm q}_{\rm ms}.$

Example

Zehnder Universal $\Phi_{\rm S}$ = 1093 W (at 55/45/24: 483 W)

Model HU-180-60

$$q_{ms} = \frac{483}{4187 (55-40)}$$
 $q_{ms} = 0.015 kg/s \approx 41.5 kg/h$

The actual mass flow $q_{\rm m}$ is therefore still:

$$q_m$$
 in $\% = \frac{q_m}{q_{ms}}$

$$q_m \text{ in } \% = \frac{41.5}{116.5}$$

$$q_{m}$$
 in % = 36% from $q_{ms} > 27\%$

minimum according to table: 27%.

The example therefore satisfies the guideline for the minimum water flow; see also minimum water flow.

Registration

Zehnder radiators are tested to EN 442 and comply with this standard.

Returns

Radiators and accessories cannot be returned.

Return connection

This concerns the connection on the radiator through which the hot water leaves the radiator and passes along the return line to the heat generator.

Scope of delivery

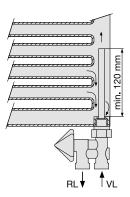

The scope of delivery for the standard version of a radiator can be found in the respective product description.

Seals

In the case of sealed connections and plugs, it may be necessary to tighten up the connection and blanking plugs depending on the water quality, e.g. in a connection to district heating, after testing the pressure or heating the system for the first time. The sealing materials supplied or used by Zehnder are intended for use in closed heating systems.

Single-pipe systems

Only possible with valves for vertical installation. We recommend using single-tube valves with an adjustable by-pass or a riser, i.e. with an adjustable water volume above the radiator. Only single-tube valves with baffle plates of at least 120 mm in length may be used. TKM and Oederlin systems with screw-in turbulators and 150 mm baffle plate. Essentially, a reduced output of at least 25% must be considered when using single-tube baffle plates. Function is often guaranteed only for certain models and up to specific lengths. Maximum lengths and an indication of how the radiators function with various makes of valve is available on request.

Special finish

Zehnder radiators are available in almost every colour conceivable. The Zehnder colour chart shows a selection of the possible colours from various colour systems, such as RAL colours, sanitary colours or the NCS-S system.

The standard finish for the entire Zehnder radiator programme is the colour RAL 9016, Traffic White. A further 33 popular colours form Zehnder colour category 1 (see the respective product tables for prices); another 12 form Zehnder colour category 2, with a surcharge on colour category 1. All other paintable colours are available for a surcharge on request.

Another coating option is the clear lacquer version for Zehnder Metropolitan (Technoline), which falls in category 2. This essentially concerns one unique colour for each radiator. For this reason, different surface structures and visual colour differences can also occur at a later point in time.

These colour deviations are not a fault and are therefore not subject to claims under warranty as described in our General Sales and Delivery Conditions.

Special prices apply for highly-polished metal surfaces and metal look. Refer also to the paint and colour chart on the back cover.

Standard data set

The standard data set contains all technical information required by layout programmes. Free data sets can be requested direct from Zehnder or downloaded from the internet (www.international. zehnder-systems.com).

Standard colour and coating

The standard colour for Zehnder radiators is RAL 9016. For more information, see "Finish".

Storage

Zehnder radiators must be stored for the long term or temporarily in dry and chemical-free rooms.

Surface protection

We recommend that installation areas affected by damp or chemicals are only fitted with radiators that are galvanised and then given a powder coating.

For possible applications, see "Galvanisation".

System temperatures

These are the temperatures at which the hot water heating system is operated (flow, return and room temperature).

Test pressure

Each radiator is checked for leaks by subjecting it to 1,3 times its rated maximum operating pressure before delivery. For orders that do not indicate the actual operating pressure, the radiator will be delivered with the operating pressure of the standard version.

Technical specifications

The technical specifications indicated in the documentation are correct at the time of printing. We reserve the right to make amendments that improve the product.

Technoline

See "Special finish"

Tolerances

Industry-standard tolerances and tolerances based on production technology are subject to change for all indicated dimensions and fall within the tolerances defined in EN 442. The maximum tolerance must be considered during pre-assembly of the pipework or fixing materials. We reserve the right to make technical amendments during the validity of the documentation as part of product improvement.

Tender specification

The description of a product is shown in the respective chapter in the product description section.

Thermal output Φ

The thermal output of a radiator model is given by the standard characteristic curve:

$$\Phi = K_M \cdot \Delta T_n$$

EN 442 defines the pan-European test procedure and the measurement method in identically arranged test laboratories.

According to the EN 442 standard, the higher temperature is calculated from the logarithmic mean between flow and return temperature as well as the intake air temperature. Excess temperature ΔT :

$$\Delta T = \frac{t_1 - t_2}{\ln \left(\frac{t_1 - t_r}{t_2 - t_r}\right)}$$

The thermal output for excess temperatures ΔT other than the standard excess temperature $\Delta T=50$ K can be calculated via the

$$\Phi = \Phi_{\text{S}} \, x \left(\frac{\Delta T}{50 \; \text{K}} \right)^n$$

equation.

Example for calculating the thermal output Φ :

$$\Phi_S = 1024 \text{ W}$$

n = 1,30 = exponent

 $t_1 = 60^{\circ}C$

t₂ = 40 °C

 $t_r = 24^{\circ}C$

$$\Delta T = \frac{60 - 40}{\ln\left(\frac{60 - 24}{40 - 24}\right)} = 24,7 \text{ K}$$

$$\Phi = 1024 \text{ W x} \left(\frac{24,7 \text{ K}}{50 \text{ K}}\right)^{1,30} = 1024 \text{ W x } 0,40 = 409 \text{ W}$$

also see "Nominal heat output"

VDI 6036

Application of the directive VDI 6036 assists all participants in the process to make a comprehensive and comparable assessment of the installation situation. As an accepted rule of technology, this directive and the resulting assessment can also be drawn on for regulation purposes in the event of damages. Directive VDI 6036 classifies applications for radiator fastenings into various requirements classes with different loads. Additional loads for various intensities of misuse can be added to the net weight and water content of the radiator as required. Zehnder publishes a recommendation for the allocation of selected fixing elements – provided not labelled otherwise – by standard for the requirements classes 1 and 2 and stable wall structures (e.g. concrete). Assignment recommendations for requirements class 3 and for special custom applications (requirements class 4) on request.

Example applications from VDI 6036:

Requirements class 1 and 2 (normal and increased requirements): owner-occupied homes, rented flats, kindergartens, hospitals, retirement and nursing homes, office buildings, doctors' surgeries/lawyers offices, retail outlets.

Requirements class 3 (high-level requirements): schools, sports facilities, youth centres, meeting places, railway stations, barracks

Requirements class 4 (very high-level requirements or special burdens):

prisons, psychiatric institutions, special agreements

Wall clearance

This is the distance between the wall and the back of the radiator. For more information, see "Reduced output".

Warranty

See our warranty conditions in 8.2 of our General Sales and Delivery Conditions (www.international.zehnder-systems.com), the warranty period for the products shown in the Price List is 5 years, and for electrical components just 2 years.

Water quality

Operating conditions and water quality according to VDI 2035 must be maintained.

Claims under guarantee will be rejected if substances (e.g. chemicals, antifreeze, etc.) which have an aggressive effect on the sealing material are added to the heating water. In case of non-compliance, no liability can be accepted in accordance with point 8 of our General Sales and Delivery Conditions for sealing material, nor for any resulting defects and consequences. Claims under guarantee in accordance with point 8 of our General Sales and Delivery Conditions will also be rendered invalid in case of:

- Operation with steam,
- Periodical or long-term emptying of the system,
- Excessive sludge in the radiators and
- Occasional or constant see page of oxygen into the system.

Wet rooms

See "Surface protection"

WEEE Statement

This product may not be treated as household waste. Instead it should be handed to an appropriate collection point for the recycling of electrical and electronic equipment. For more detailed information about the recycling of this product, please contact your local council office or your household waste disposal service.

Functional principle

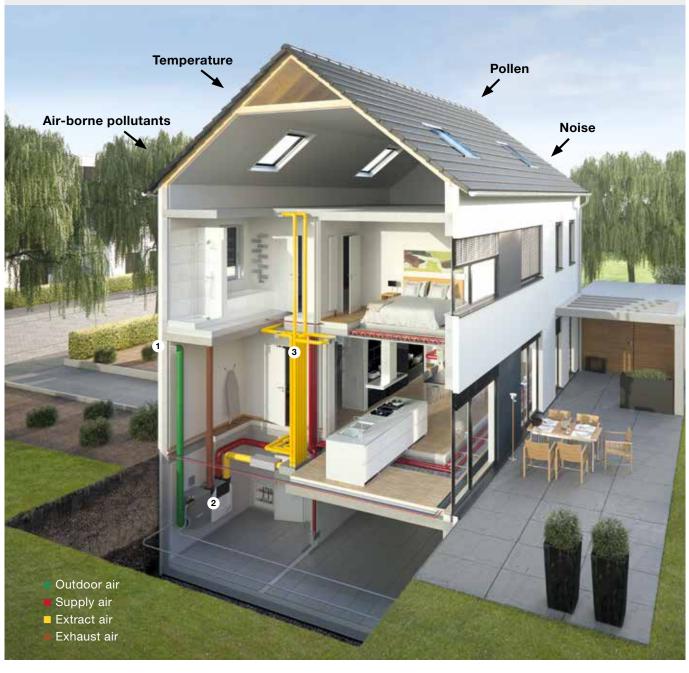

ComfoFond

Geothermal heat exchanger (optional)

ComfoUnit

ComfoFresh Air distribution

- 1. Fresh air is fed into the system via an external wall vent. The fresh outdoor air can optionally flow through the Zehnder ComfoFond-L sub-soil heat exchanger, which uses geothermal energy to pretemper the outdoor air.
- 2. The Zehnder ComfoAir ventilation unit recovers up to 95% of the energy from the extract air and returns it to the fresh air. This can be humidified, dehumidified and pre-tempered using optional components.
- 3. The Zehnder ComfoFresh air distribution system channels fresh air at the right temperature to individual rooms as needed and vents the extract air to the outside. The air volume can be individually adjusted for each room.

Comfortable indoor ventilation from Zehnder

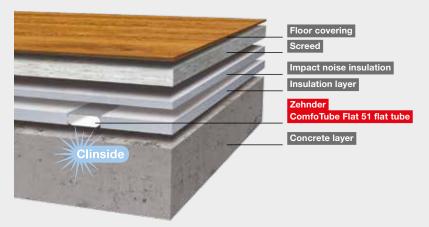

Air distribution system - effective and hygienic

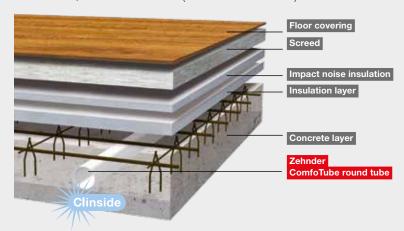

The perfect addition to comfort ventilation units: This harmonised system supplies fresh air to all rooms and removes stale, moist, contaminated air and odours. It is simple and flexible to install, quiet and faultless to operate.

Variants with round or flat oval tubes are available for the air distribution. So you can be highly flexible when handling any build situation. Both can be integrated easily into the building and fitted with speed. Simply select the best variant for you - or combine the two if that makes more sense.

The air distribution system with flat oval tube for cover, wall and floor (Zehnder OnFloor)

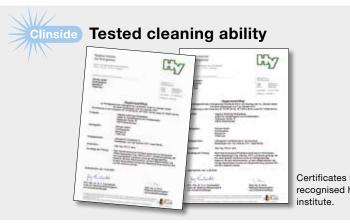

The air distribution system with round tube for cover, wall and floor (Zehnder InFloor)

- Installation friendly, flexible tubes
- High-quality food grade plastic (HDPE)
- Clinside smooth inner skin for clean tubes
- Centrally and peripherally adjustable airflow rates
- Low pressure loss
- Easy to clean

Clean due to Clinside: The smooth inner skin prevents the build-up of dust. Cleaning is easy.

Certificates issued by a recognised hygiene

Benefits

- Optimum fresh air supply helps you stay healthy
- Hypo-allergenic
- Filtering out pollutants
- Retention of the property's value by preventing mould from developing in the building's basic structure
- Energy saving through heat recovery
- Protects against outside noise

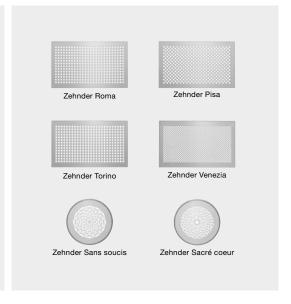

Zehnder ComfoAir ventilation units

- For use in demanding residential and commercial buildings
- Up to 95% heat recovery by cross-counterflow heat exchanger
- Fans with extremely efficient EC motors
- 100% automatic by-pass
- Option: Electric pre-heater or enthalpy exchanger

Zehnder designer grilles

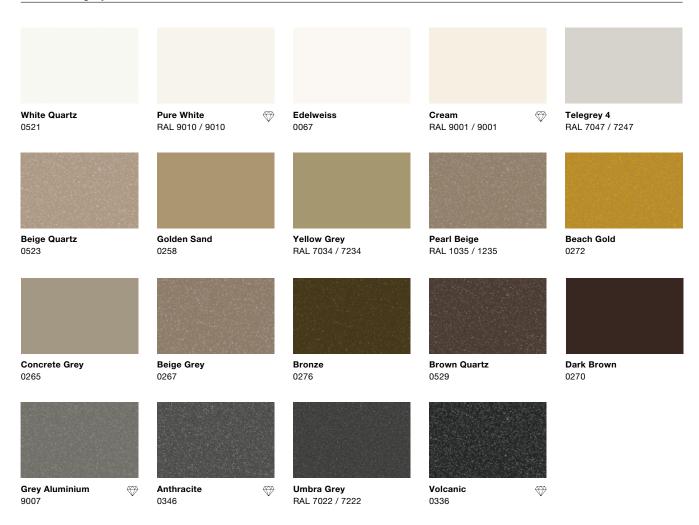

- Elegant and discreet
- For every interior
- Surface-mounted and flush-mounted version
- Available in white or stainless steel
- Suitable for displacement ventilation

Warm colours

Colour category 1: CORE

Colour category 2: TREND

Unlike to the colour standard (here RAL tone) the Zehnder no. also includes the features matt respectively glossy. Therefore the RAL standard and Zehnder no. differ in many colours. Please note that the prices always relate to the given finishes matt or glossy, deviating finishes will be calculated like colours outside of the colour cart. These colours are finished with a gloss finish; all other colours are matt-finished.

Other special finishes in the RAL, RAL-D, NCS-S, Sanitary, DB colour systems are available as required, surcharges on request.

Cool colours

Colour category 1: CORE

Colour category 2: TREND

Surcharge for colour category 2: 146,76 €

Some colours/surfaces are only available for selected products. Please also see the notes on the respective product pages. For Special surfaces of the Studio Collection, please see the respective product chapters. Special colours on request. Due to different manufacturing techniques of the original colours, deviations can occur in colour and polish. RAL and NCS are designations from the manufacturer. The respective colour code (EDI) is set at the 9th and 10th places in the article no.

Zehnder World of Colours
